Education

NIT Patna

Electronics and Communication Engg., B.Tech

CGPA: 7.53/10

June 2019 - June 2023

Patna, Bihar

Technical Skills

Programming Languages: C, C++, JavaScript, Python
Technologies/Frameworks: React JS, Node JS, Express JS, React-Flow, Redux
Tools / Platforms: HTML, CSS, Object Oriented Programming, Operating System
Databases: MySQL, MongoDB, DBMS

Experience

Lotus Interworks | (SDE-1)

Remote - USA Based | July 2023 - April 2024

Platform

- Built a strong ReactJS phone settings UI with features like editing and deleting, connecting smoothly with APIs.
- Designed an easy-to-use issue tracker UI with different buttons for improved user experience, showcasing my skills in UI design and API integration.
- Developed a full-stack app using React, Node.js, Express, n8n, and MySQL, reducing data update time by 50% through real-time synchronization between a UI table and a Google Spreadsheet.
- Successfully delivered scalable and visually appealing UIs, underlining a commitment to excellence in frontend development.
- Contributed to the development user-friendly interfaces that led to a 40% increase in user engagement and a 25% reduction in customer support queries..
- Tech Stacks Used : Reactjs ,HTML, CSS, javascript,Node.js,Express.js,MySQL,n8n

Projects

Restaurant App | [Github](#) [app-link](#),

ReactJs ,Javascript, NodeJs , ExpressJs , MongoDB

- * Designed Restaurant app features of hero section, menu display, team intro, and a reservation system, with user reservations validated via a backend API and securely stored in MongoDB.
- * Created an engaging and intuitive UI, enhancing user experience with smooth navigation and responsive design.

Crud App | [Github](#) [app-link](#) ,

ReactJs,Redux,Bootstrap,HTML , CSS,Javascript

- * The app enables CRUD operations with Redux state management, uses React Router for navigation, and incorporates Bootstrap for styling.
- * Built a user management application leveraging React and Redux for the frontend, improving the user interface with seamless navigation and an adaptive layout.

Simon Game | [Github](#) [app-link](#) ,

HTML , CSS ,Javascript

- * This game checks short term memory and observation skill of user. it has multiple levels and difficulty increases with increase in level.
- * Created the Simon-Game, a short-term memory challenge, by designing an interface that improves user experience with fluid navigation and an adaptable design.

Acheivements

- Among Top 10% globally on **Leetcode** with contest Rating of 1612.
- solved more than 750+ DSA problems on **Leetcode** (550+) and **GeeksforGeeks** (250+).
- Received Elite+silver badge. on a C++ programming course by NPTEL.
