SUMMARY

Experienced AI professional with over three years of expertise in developing and deploying conversational AI solutions. Currently serving as a Cognitive Technical Lead, driving impactful AI strategies, mentoring cross-functional teams, and delivering scalable, client-centric solutions. Proficient in NLP, Machine Learning, and API integration, with a track record of improving operational efficiency and achieving measurable business outcomes.

SKILLS

- **AI Development:** NLP, Machine Learning, Dialogflow AI chatbot, LLM(e.g., GPT4), Amelia AI chatbot.
- **Programming:** Python, Groovy, C
- **Web Development:** HTML, CSS
- **API Integration:** Google Calendar API, Workday API, JIRA API, Twilio, ServiceNow
- **Leadership:** Team management, project coordination, training delivery

WORK EXPERIENCE

Cognitive Technical Lead, @SoundHound AI

Dec 2024 – Present

- Spearheaded the design and deployment of scalable conversational AI solutions for industries such as healthcare, insurance, and IT services.
- Led cross-functional teams to execute AI-driven automation strategies, enhancing client workflows and operational efficiency.
- Improved chatbot accuracy by implementing robust model training pipelines and advanced NLP techniques.
- Delivered measurable business outcomes, including a 20% reduction in resolution times and improved user satisfaction scores.
- Oversaw seamless integration of AI systems with third-party APIs, enabling interoperability across enterprise applications.
- Mentored junior engineers and conducted training sessions, fostering skill development and knowledge sharing.

Cognitive Implementation Engineer, @Amelia.ai

Sept 2021 – Dec 2024

Conversational AI Solutions:

- Delivered fit-for-purpose, efficient, and high-quality conversational AI solutions using the Amelia platform, based on extensive transversal analysis and client-approved architecture.
- Delivered training and coordinated New Hire Training (NHT) and provided client training over the years.

Model Training:

- Designed and developed end-to-end solutions for ITSM/ITSD, HRMS, and customized guided diagnostics use cases across diverse industries such as pharmaceuticals and insurance.
- Trained ML models to achieve impeccable intent and entity recognition in chats using Amelia capabilities.

Integration Development:

- Developed integrations with third-party systems like Workday, M0365, Twilio, ServiceNow, Ping ID, VMware APIs, IPsoft's 1Desk, and 1RPA, as well as Cherwell APIs.

API Utilization:

- Utilized various APIs, including Google Calendar API, Workday API, and JIRA API, and built integrations using Camel Integration.

Channel Management:

- Managed conversational interfaces across multiple channels, including custom UI, voice, Microsoft Teams, and Slack.

EDUCATION

Bachelor of Engineering in Electrical Engineering
University BDT College Of Engineering

2016 - 2020

CERTIFICATIONS

- Introduction to Generative AI Certificate – Google
 - Introduction to Large Language Models – Google
 - Workshop Certificate of AI – NITK Surathkal
-

ACHIEVEMENT

- Reduced project delivery time by 15% through optimized workflows and efficient team coordination.
 - Enhanced chatbot accuracy by 25% by implementing advanced NLP models and rigorous testing frameworks.
 - Onboarded and trained a team of 10 engineers, reducing ramp-up time by 30%.
-

INTERESTS

- Exploring emerging AI technologies
- Storytelling and creative problem-solving
