

Prabhakaran R

+91 9884898401 | prabhakaran14ad@gmail.com | [Linkedin](#) | [Github](#)

Built AI agents, multi-stack agents, systems for recommendation, validation, and for kpi/okr's. Very familiar with building RAG applications, fine tuning models, and great understanding in optimizing the ML models, expertise in handling NLP and also into developing apps & websites, and exposed to both building & working in startup, won hackathons, Google certified data analyst.

WORK EXPERIENCE AND KEY PROJECTS

AI Engineer, SPI Edge/Aspire

Sep 2024 – Present

Chennai, India

- Built an habit validation system that verifies tasks submissions in real-time, with 90% accuracy.
- Built RAG models for efficient internal documentation processing, using OpenAI models.
- Implemented Generative AI techniques and prompt engineering for creating SEO optimized copies & mood board images, and data-driven dashboards, also generated inference & insights, all with the help of Groq API's, Hugging face spaces, and using llama models, Flux, Stable Diffusion, runaway, and other spaces.
- Developed business applications, and modified websites.

Founder, Contribud

Dec 2023 – Aug 2024

Chennai, India

- Built a social media for freshers, that helps freshers to show their skills, validate and get hired quickly. by building an skill validation system that helps them showcasing their skills and bring trust in their portfolio.
- As Solopreneur, developed the it using flutter/dart for frontend and firebase for authentication, backend & database.
- Exposed to both technical and non-technical areas, pitched it on multiple events, participated in Hackathons and won prizes and audience.

Other Internships & Projects

Mar 2022 – Apr 2023

Multiple Organizations

Various Locations

- Personal Projects - Multi agent Pizza delivery system, Recipe recommendation system, multiple chatbots, greatly handling in NLP inputs. Created many GPT wrappers, custom integration models, and Opensource contributions.
- Digialert - Automated the process of analyzing system log for vulnerability using ML, used splunk, hadoop, & AWS.
- Technolabs - Practiced data analysis techniques, built various data pipelines, impression on various data modeling techniques.
- NanoMatics - Built automatic temperature monitoring trigger system using Raspberry pi.

TECHNICAL SKILLS

AI & ML: NLP, Numpy, Pandas, LangChain, Scikit-learn, Tensorflow lite, Pytorch, CNN, keras.

Programming Languages: Python, Flutter/Dart, SQL, C++, HTML, CSS.

Database & Frameworks: MySQL, PostgreSQL, MongoDB, Firebase, Core ML, Riverpod, OpenCV, Flask, FastAPI.

Tools & platforms: OpenAI, Hugging face, AWS, Groq, Power BI, AWS, Git, Docker, CI/CD pipelines, Jupyter.

EDUCATION

Buildspace - Gaudmire Season 5

2024

6 weeks Startup Bootcamp

Velammal Engineering College

2020 – 2024

B.Tech in Artificial Intelligence and Data Science CGPA: 8.49

Sri Bala Vidyalaya CBSE

till - 2020

Higher Secondary Education - 10th: 83.40% & 12th: 79.40%

ACHIEVEMENTS

- Won 3rd place in Techstars startup weekend sponsored by Google.
- Secured 2nd place in Business Model Competition by IIT Bombay (Eureka BMC).
- Google Certified Data Analyst.
