Technical Skills

- SQL
- Python
- SQL Server Integration Services (SSIS)
- SQL Server Reporting Services (SSRS)
- Microsoft SQL Server
- MySQL
- Microsoft Excel
- Microsoft Office
- SQL Development
- Data Extraction
- Data Warehousing
- Data Analytics
- Data Visualization
- Unix

Soft Skills

- Observation
- Decision making
- Communication
- Multi-tasking

Certifications

- Advance SQL, Great Learning
- SQL (Advanced) Certificate, HackerRank
- Problem Solving (Basic) Certificate, HackerRank
- My SQL Basics, Great Learning
- Structured Query Language (SQL) (Advanced), Study Section
- SQL (Intermediate) Certificate, HackerRank
- SQL (Basic) Certificate, HackerRank

Education Background

National Institute Of Technology Sikkim
Bachelor Of Technology
Electronics and Communication Engineering
Completed in 2019

About Me

2.8+ years of professional IT experience with expertise in SQL development, ETL and Reporting services with strong verbal and written communication skills and solid analytical skills for writing relational database solutions for businesses.

Professional Experience

Avendata Technologies Pvt Ltd, Mumbai — SQL Developer *Apr 2022 – May 2023*

Key responsibilities:

- Managed the archiving of the legacy systems by writing complex SQL scripts in MySQL, enhancing data retrieval speed in alignment with client specifications.
- Optimized performance through debugging and refining existing SQL scripts using CTEs and window functions.
- Created stored procedures and triggers to automate data manipulation processes.
- Collaborated with cross-functional teams to devise logic for new SQL scripts, utilizing complex joins and subqueries extensively.
- Tackled various SQL-related support issues on a regular basis.
- Participated in agile environments, contributing to user requirement gathering, software development, testing, and bug resolution.
- Created and maintained technical design and business requirement documentation.
- Tracked project milestones and identified any outstanding issues, while ensuring quality and timely delivery.
- Provided comprehensive post-implementation support by pinpointing defects, inconsistencies, and errors.

Infosys, Bhubaneshwar — System Engineer *Feb 2020 – Oct 2021*

Key responsibilities:

- Worked closely with IT staff to maintain smooth operations of all systems connected with database environment.
- Developed and managed SSIS jobs, scheduling them for daily, weekly, and monthly execution.
- Proficiently employed joins and subqueries to simplify intricate queries across multiple tables.
- Engaged in the development of Tables, Views, Indexes, Stored Procedures, Triggers, and Queries on MS SQL Server and Oracle databases.
- Consolidated data from diverse sources using SSIS, conducting data validation and report generation.
- Created comprehensive parameterized and drilldown reports through SQL Server Reporting Services (SSRS).
- Executed data mapping to facilitate the extraction, transformation and loading of data into target tables.
- Created documents for technical and business user requirements during requirements gathering sessions.
- Collaborated with business users and supervisors to collect and analyze business requirements efficiently.
- Completed training in Python, SQL and Business Intelligence (MSBI).
