

PRADEEP KUMAR

(Mobile) +91 9908622050

(Email) yes1pradeep@gmail.com

Data Scientist with 10+ years of experience in creating innovative technology solutions across diverse industries with good exposure into ETL, Big Data, Cloud, AI, ML and DevOps technologies.

Data Scientist at ABSA Investment Bank on CTG Payroll, Aug 2020 – Nov 2024

- Experience in designing the project architecture and building GenAI applications using foundation models and building domain specific Chatbots using RAG based frameworks
- Developed Agentic AI systems which integrates the system applications with foundation models and allows the agents to generate insights that take actions for connecting to API's and Databases for building LLM models
- Responsible in feature engineering, building predictive classification models, evaluating the performance of predictive model through metrics, and frequently re-training the machine learning models in production through CI/CD implementations
- Performed data analysis with Pandas and NumPy, identifying key market trends that shaped the product roadmap and directed strategic planning and assisted in the development of analytical tools by providing insights into customer behavior patterns

Tools & Technologies: -

- Python, SQL, AWS, Bedrock, GenAI, Langchain, Llama, Dockers and Kubernetes

Lead Data Scientist at V2 Solutions, Aug 2018 – April 2019

- Worked on Fraud prediction and Churn prediction models for a financial client
- Worked on NLP and Image Recognition projects for a HealthCare Client using deep learning frameworks
- Increased digital sales by improving e-commerce experience on existing websites through A/B tests, and performing time series forecasting analysis for the upcoming financial year, resulting in 100% increase in online sales
- Generated a robust suite of automated tests, leading to a 50% decrease in bug recurrence and improving code deployment cycles by two-fold.
- Understand the range of products through segmentation techniques, study the customer behavior, purchase patterns, and proactively bring insights into every decision and discover future opportunities

Tools & Technologies: -

Python, Numpy, Pandas, Sklearn, Statsmodel, Azure, Flask, Databricks

Senior Software Engineer at Larsen & Toubro Infotech, Sep 2014 – Jul 2018

- Worked on demand forecasting models to the peak load demand of the premium customers and increased the revenue by 1 million USD

- Developed risk prediction models for banking client using classification algorithms and deployed these classification models on Azure
- Developed and deployed Deep learning Models using Convolutional Neural Networks for predicting test reports conducted by a Medical Laboratory on AWS platform
- Developed Image to text conversion product for extracting entities from Images/PDF and generating runtime reports required for the Business using Web based API's

Tools & Technologies: -

Python, Pandas, Numpy, Keras, Tensorflow, Pypdf2, CNN, RNN, NLP, Theano, CNTK, Pytorch, Spacy, NLTK, Gensim, Seq2Seq, AWS, Azure

Senior Software Engineer at Triumph Systems, Feb 2014 – Aug 2014

- Worked on Up-selling and Cross-selling of products for a telecom client and increased the market share from 30 % to 40%
- Predicting customer who have the potential for upgrading their current usage plans and for predicting customers who can be cross sold across products like Mobile, DTH & BB

Tools & Technologies: - R, Python, Pandas, Numpy, API

KEY TECHNICAL SKILLS

COMPETENCY	SKILLS
Statistics	Descriptive, Predictive & Prescriptive Analytics, Time Series Forecasting
Big Data / Cloud	Hadoop, Spark, MapReduce, Hive, Kafka, Flume, AWS, AZURE
Tools / Scheduler	Alteryx, Informatica Power Center, Tivoli (TWS), Control M, Autosys
ML/DL Algorithms	Linear, Logistic, Decision Tree, Random Forest, SVM, K-means, KNN, PCA, Boosting & Bagging, Neural Nets, Computer Vision, NLP, Deep Learning, Time Series Forecasting
Language/Database	C, SQL, R, Python, HTML, XML, JSON, SQL Server, Oracle, Teradata, MongoDB
Dev Ops	Git, CI/CD, Maven, Terraform, Ansible, Jenkins, Dockers, Kubernetes
