DEVOPS ENGINEER

LINUX | AWS | GIT | GCP

SUMMARY

- Over 3 years of experience as a DevOps Engineer specializing in Linux and Hybrid-Cloud Infrastructure.
- Hands-on expertise in AWS (EC2, S3, RDS, IAM, VPC) and GCP (BigQuery, Pub/Sub, Compute Engine, Cloud SQL).
- Skilled in Docker, Kubernetes, and automating deployments with Terraform and Ansible.
- Proficient in managing CI/CD pipelines with Jenkins and version control with Git.
- Experienced in monitoring and logging using Prometheus, Grafana, and CloudWatch.
- Strong background in Agile practices, optimizing processes, and improving service delivery.

WORK EXPERIENCE

Application Support Engineer

FSM Global Software Solution Pvt. Ltd | Chennai

May 2022 - Aug 2024

- Implement and maintain comprehensive backup and recovery procedures to safeguard critical application data, ensuring business continuity.
- Proactively monitor and troubleshoot application performance, collaborating with development and operations teams to minimize downtime and enhance user experience.
- Develop and enforce robust system security policies, leveraging log analysis and metrics to identify and mitigate potential vulnerabilities.
- Manage CI/CD pipelines using tools like Jenkins, enabling seamless integration and deployment across multiple environments.
- Utilize Infrastructure as Code (IaC) tools such as Terraform and Ansible to automate provisioning, configuration, and infrastructure management.
- Experience managing ticketing tools like Freshdesk, Jira, and Redmine to streamline support processes and ensure efficient resolution of incidents in Agile environments.

Desktop Support Engineer

Progressive Infovision Pvt. Ltd | Chennai

Jul 2021 - Apr 2022

- Provided technical support for desktops, laptops, and mobile devices via phone, email, and in person, ensuring minimal disruption to end-users.
- Proactively troubleshoot and resolve application issues, collaborating with development and operations teams to enhance system reliability and reduce downtime.
- Managed and maintained ticketing tools like Freshdesk and Jira, ensuring efficient issue tracking and resolution.
- Installed, configured, and maintained devices while implementing CI/CD pipelines to streamline deployment processes across multiple environments.
- Leveraged Infrastructure as Code (IaC) tools such as Terraform and Ansible to automate provisioning and system configurations.
- Participated in Agile processes and training programs to enhance technical skills, collaborating with IT and DevOps teams to resolve complex infrastructure and operational challenges.

Hans On Experience Skills

- **Cloud Technologies:** AWS, GCP
- **DevOps Tools:** Jenkins, Docker, Kubernetes, Terraform, Ansible.
- **Programming Languages:** Groovy, Bash Scripting, Python.
- **GCP Service:** Compute Engine, Cloud Storage, Cloud SQL, Kubernetes Engine, Cloud Function, Bigtable, BigQuery, Cloud DNS, VPC
- **Monitoring Tools:** GSS, Grafana, CloudWatch
- **Soft Skills:** Communication Skills, Problem-Solving, Adaptability Innovative, Team Collaboration, Work Collaboratively.

EDUCATION

SRM University | Chennai

May2018 – Jun 2020 - MCA
