

RESUME

Pradnya Bhore
RPA Developer

Email: pradnya.bhoree@gmail.com
Mobile: 9137750890

OBJECTIVE

IT Professional of RPA Developer, looking to secure a promising position that offers both challenges and good opportunities for growth, enhance my skill and enable me to strive towards the overall development of the organization.

KEY SKILLS

- ✚ Optimistic
- ✚ Good Listener and Quick Learner
- ✚ Ability to work in team oriented, multi-tasking, fast-paced environment.
- ✚ Problem Solving Skills.

EDUCATIONAL QUALITIFCATION

- ✚ Bachelor's in Engineering from Pune University, Maharashtra.
- ✚ Master's in Business from Bharti Vidyapeeth University, Maharashtra.

CORE COMPETENCIES

Programming	Core JAVA, SQL, HTML
RPA Tools	Process Studio,Ui path
Defect Tracking Tool	JIRA
Database	SQL,Oracle,PostgreSQL
API testing	Postman Tool

PROFESSIONAL SUMMARY

- + 4.8 Years of RPA automation experience in GUI-based applications using RPA tools with RPA best practices and support responsibilities include root cause analysis, management, communication, client relationship management in partnership with infrastructure service support in Banking.
- + I am proficient in two leading RPA Tools: UiPath and Process Studio.
- + Expertise in Functional Testing, API & Database, Excel-based automation
- + Worked on Selenium WebDriver with Java Lang & good with Core Java concepts.
- + Experienced in API Testing using POSTMAN.

PROFESSIONAL SYNOPSIS

- + Developed automation for Web-Based, Excel-based applications.
- + Developed and Integrated API automation.
- + Using Excel automation for reading input for the bot and creating process file for users for identification of data processed by the bot.
- + Worked closely with business users in identifying and defining the requirements and analyzing them.
- + Ensure reusable components are designed and developed where applicable.
- + Automating Microsoft applications like Outlook and Excel automation.
- + Custom coding for real-time logging for the execution Bots.
- + Bot scheduling using the event and time-based triggers for the processes deployed in production for Process Studio and UiPath.
- + Creating reliable selectors using Ui Explorer tool of the UiPath and Process Studio.
- + Proficiently handle exceptions using Try-Catch activity, throw, and Rethrow.
- + Identification and troubleshooting of the issue escalated by the end users and provide the root cause analysis (RCA) and solution to resolve the issue.
- + Monitor the bot events, and virtual machine alerts, and process the requests from the business users for continuous enrichment of the production bots.
- + Capable of automating PDF documents efficiently.
- + Handle change management tickets (CR) to integrate the new requirements from the business users testing in UAT and deploying in production.
- + Skilled in troubleshooting and debugging, with a strong emphasis on problem-solving.
- + Using JIRA for defect tracking and interaction with developers and customers for the resolution of the issue.
- + Effectively collaborated with business users and stakeholders on a day-to-day basis. Involved in Code review and fine-tuning the code for performance-related issues
- + Implemented Agile Methodology process in the project
- + Strong experience in the entire Software Development Life Cycle (SDLC)
- + Quick learner and excellent team player, ability to meet tight deadlines and work under pressure.

PROFESSIONAL EXPERIENCE

Designation : (RPA Developer

PROJECT#1 : Loan Repayment Processing Automation

Project description:

Developed an automated system to streamline the loan application processing Excel-based workflow, significantly reducing the time taken to evaluate the records manually. The solution integrates data validation, risk assessment, and decision-making processes, ensuring consistency and compliance with regulatory standards.

Description of Roles Performed:

- ✚ Analyzing & validating the completeness of business requirements & preparing test documentation.
- ✚ Design and development of Test scenarios & Test cases.
- ✚ Collaborate with team to develop effective strategies.
- ✚ Designed an automated workflow to collect and validate loan application data from various sources, including branch inputs.
- ✚ Automated the generation of approval or rejection notifications to applicants, enhancing communication efficiency.
- ✚ Create status reports and attend status meetings on monthly basis with Manager.

PROJECT #2 : Daily automation of LG and LC Updation

Project Description:

Developed a BOT to automate the updating of LG and LC codes in the application using user-provided Excel files. Implemented a Maker-Checker process to ensure accuracy. The solution also includes a daily summary report detailing the updated LG and LC codes, enhancing data integrity and operational efficiency.

Description of Roles Performed:

- ✚ Analyzing the requirements and communicating with BA team for better understanding of the requirements.
- ✚ Established a Maker-Checker workflow for validation of LG and LC code updates
- ✚ Actively participated in Grooming Meeting.
- ✚ Designed and developed BOT for processing excel files and updating records in application.
- ✚ Identified End to End Test Scenarios, Test Cases and Test Data.
- ✚ Automated the generation of daily summary reports to track changes
- ✚ Designing and Execution of E2E test cases for SIT

PROJECT #3 : Cassette Swapping Cash ReUtilization

Project Description:

Enhance the efficiency and sustainability of ATM operations by implementing a streamlined cassette swapping and reutilization process. This project aims to minimize operational downtime, reduce costs, and promote environmentally friendly practices in ATM cash management. The project involves the development of a standardized procedure for swapping out cash cassettes at ATMs while ensuring optimal reuse of cassettes across multiple machines.

Description of Roles Performed:

-  Analyzing the requirements and communicating with BA team for better understanding of the requirements.
-  Prepare Perform checks to ensure that the data is complete and accurately formatted.
-  In maker cross-referencing the entries with original file.
-  Responsible for testing deliverables, priorities, and monitors activities to meet such dates for individual assigned features.
-  Validation of Expected output vs Actual output.

INTERESTS

Learning new things, Dancing.

DECLARATION

I hereby declare that all the above-mentioned details are correct to the best of my knowledge and belief.
