

PRAJWAL M B

DATA ARCHITECT

Bangalore | +91 7022997062 | prajwalgowda2906@gmail.com | [linkedin.com/in/prajwal-m-b](https://www.linkedin.com/in/prajwal-m-b)

PROFILE

Result-driven Data Architect with proficiency in data modeling, data quality, governance, security, integration, and analysis. Skilled in Data Modelling, SQL, Python, Pyspark, Data, ETL, Data Mining Requirements analysis and Project Planning. Consistently updating expertise with the latest technologies. Demonstrated problem-solving abilities and a focus on performance tuning.

SKILLS

Skills: Proficient in Data Modelling, Python, SQL, NoSQL, Pyspark. Experienced in Requirements Gathering and Analysis, Data Warehousing, Project Planning.

Libraries: NumPy, Pandas, Matplotlib, PySpark, Familiar with ETL techniques, Data Mining, and Data Analysis.

Tools: PostgreSQL, Proficient in Data Modelling using Draw.io, ETL tools such as SSIS and SQL Server. Experienced in Development/Project Management with Jira, and Cloud services with AWS.

WORK EXPERIENCE

Royal Brothers., Bangalore Junior Data Architect

FEB 2023 - PRESENT

- Proficient in developing and maintaining data architecture solutions ensuring data integrity, security, and accessibility for effective analysis and decision-making.
- Experienced in designing logical and physical data models to optimize storage and retrieval aligned with business objectives.
- Involved in Agile project management using Jira, ensuring efficient project planning and execution.
- Skilled in improving and maintaining data quality and integration practices to enhance system performance.
- Extensive hands-on experience with Amazon RDS and SQL querying languages for efficient data management.
- Successfully improved database performance by 40% through Database tuning and optimization.
- Strong expertise in RESTful API design for scalable web applications, facilitating faster development across projects.
- Skilled in data preprocessing and analysis using NumPy, Pandas, Matplotlib, and seaborn.
- Knowledgeable in data processing using PySpark, applying best practices for effective data handling.
- Familiarity with data warehousing technologies, dimensional modeling, ETL tools like SSIS, and industry best practices.

Compsoft Technologies., Bangalore Intern

AUG 2021 - SEP 2021

- Internship focused on Loan Amount Analysis and Prediction, spanning two months.
- Key responsibilities included data preprocessing and exploratory data analysis (EDA) to understand data patterns and insights.

- Developed Machine Learning models to predict loan outcomes based on historical data.
- Applied feature engineering techniques to enhance model performance.
- Collaborated with team members to present findings and recommendations based on predictive models.

PROJECT EXPERIENCE

Key Projects: Vehicle Exchange System, Vehicle Health Management System, Vehicle Service Projections System, Advanced Vehicle Blocking System, Odometer Conflict Resolution

- **Role:** Led the design, development, and implementation of multiple systems to support business operations and enhance data management.
- **Responsibilities:**
 - **Database Design:** Architected and optimized databases to ensure data integrity and efficient access across all systems.
 - **SQL Development:** Developed and optimized complex SQL queries for data manipulation, reporting, and integration.
 - **Requirements Gathering and Analysis:** Collaborated with stakeholders to gather detailed business requirements, conducted analysis to translate them into technical specifications.
 - **Use Case Development:** Created comprehensive use cases to define system functionalities and user interactions.
 - **Process Modeling:** Designed process models to map out workflows and optimize system processes.
 - **User Acceptance Testing (UAT):** Led UAT efforts to validate system functionality, ensure alignment with business needs, and guarantee a seamless user experience.
- **Bike Model Occupancy Data Warehouse:** Designed a data warehouse to improve the management and analysis of bike model occupancy data, utilizing **Dimensional Modeling (snowflake schema)** techniques to optimize reporting and data retrieval.

EDUCATION

B.E in Information Science and Engineering - 8.02 CGPA	2018 - 2022
2018 - 2022	

S J C Institute of Technology

12th Standard - 85.33%	2017 - 2018
-------------------------------	--------------------

Swami Vivekananda PU College

10th Standard - 90.08%	2015 - 2016
-------------------------------	--------------------

Swami Vivekananda English High School

DECLARATION

I hereby declare that all the above information given is true to my knowledge and I hold the responsibility of all the above- mentioned information.
