A **Senior Android Developer** with overall **8.10+ years** of experience at **Tesco, Bangalore** in developing cutting edge and highly scalable applications with solid understanding of clean architecture guidelines. An ardent follower of Android meetups such as [BLRDROID](#) or [Google Developer Group](#).

SUMMARY

- Experience of **8.10+ years** as an Android Developer at **Tesco, Bangalore** from **Mar 21, 2023 till Aug 12, 2024**.
- **Second Regional Winner** for **Accenture Digi Hackathon 2017** for the best idea for an **android app**.
- Hands on experience in software development in **Java, kotlin** and **Android**.
- Hands on experience on Android design patterns such as **MVC, MVP** and **MVVM**.
- Good understanding of **Kotlin Coroutines, Flow, RxJava with Retrofit** and **RxAndroid** for Reactive programming.
- Well versed with the Activity life cycle, Fragments and Services in **Android**.
- Proficient in **mongoDB** and **MySQL** Server.
- Well versed with the design patterns such as **Singleton, Factory Method** and **Adapter**.
- Good understanding of the SDLC methodologies such as **Agile model** and **Waterfall model**.
- Good interpersonal and analytical skills, and very collaborative in teams.

TECHNICAL SKILLS

- **Programming** : Java, Kotlin, Android, JNI, Retrofit, OkHttp, LiveData, Jetpack Compose, Kotlin Coroutines, RxJava, RxAndroid, Proguard, Dagger2, MQTT, view binding, FCM notifications, Google Maps v2.0, Geofencing, Google DistanceMatrix API, Android NDK, PAYTM SDK, Stripe SDK, JDBC.
- **Tools used** : IntelliJ IDEA, Android Studio, Hedgehog, RoboMango.
- **Design patterns** : MVC, MVP and MVVM.
- **Version Control** : Git, SVN.
- **Databases** : mongoDB 3.4, MySQL.
- **Operating Systems** : macOS, Ubuntu, Windows.

EXPERIENCE (8.10+ YEARS) Sr. Software Engineer at **Tesco**, Bengaluru

Mar, 2023 – Aug, 2024.

- Involved in development of an app called [Tesco](#) for ordering groceries online while utilizing clubcard offers.
- Implemented the app by using multi-modular approach and used **Jetpack Compose** and **Apollo GraphQL client**.
- Responsible for A/B testing using leanplum for features.
- Implemented 3DS payments via internal bountySDK.

Sr. Software Engineer at **Ula**, Bengaluru

Sept 2021 – Dec 2022.

- Involved in development of an app called [Ula](#) for ordering groceries online and earn profits by selling them by themselves.
- Involved in developing their feature called **Teman Ula** which contributes to **25.7% GMV** which enables small retailers to stock up on the goods and sell them to consumers online via their online store.
- Implemented the app UI using **Jetpack Compose** and used Unit testing.
- Responsible for improving the crashlytics crash free users to 99.5% by fixing top five crashes per sprint.
- Responsible in analysing the fraud detection using **Grab Defence SDK** and henceforth reduced frauds.

Sr. Software Engineer Android at [Lowes India](#), Bengaluru**Sept 2020 - Sept 2021.**

Lowes is an American retail company for home improvement for selling furniture, hardware and building materials. My role involves in development of their App (Receiving App) and libraries.

- Involved in development of an app called [Lowes](#) for ordering furniture online and making a curb side pickup from a nearby store.
- Involved in development of an app called Receiving (Unload & Packout) app for Unloading the inventory from the trucks which arrive at the stores and check-in to the stores post unloading by associates which internally calculates efficiency of an associate.
- Implemented the app using **clean architecture** using **MVVM**.
- Worked on their internal libraries called check-in checkout library (for check-in inventory and checkout from the store) which are distributed via **Maven**.

Sr. Android Developer at EzeTap by RazorPay**May 2019 - Sept 2020.**

EzeTap is a startup which helps the merchants to accept payments via an omni-channel payment system irrespective of the instruments/ form-factors and the devices. My role involves in designing, architecting and implementation of their product features and release (Android).

- Involved in development of an app called [EzeTap](#) which is an omni-channel payments platform for accepting payments.
- Implemented the app in **MVVM**, **RxJava**. It acts as a rendering engine which fetches a JSON called config JSON and renders the widgets/triggers actions as per the JSON even the API hits. Branded the colors in app with the color codes given in login response using **PorterDuff** and made it totally dynamic from **scratch**.
- Worked on an SDK/Library module called [ezetap payments SDK](#) which all our merchants consume for accepting the payments.
- Worked for **Amazon BQR** project with **Kotlin** for accepting the payments for their shipments.
 - Worked along with few of the printer cum POS devices such as Telpo, PAX A920/A910 for enabling the merchants to swipe the cards and read data and enable them to print the receipts as per the

Sr. Android Developer at 3Embed software technologies private limited**Dec 2017-May 2019**

configuration they give in portal.

[3Embed](#) is a startup which helps in building clone scripts. My role involves in designing and implementation of their base product features and release (Android).

- Understanding the software requirements specification, feature design and development as per the agile methodology in a 2-week sprint cycle.
- Involved in development of an app called [ServiceX](#) which acts as an aggregator app with Kotlin in order to book cabs for kids, old people with the selected drivers and also book local service providers such as plumbers, cleaners, electricians, etc., online via a single app.
- Built a golf club management system called [ClubCentral by Foretees](#) to make a tee time reservation, order food in the game, tip the caddie and request for the valet via the app after the game is done.

Software Developer at Cloud4School technologies Dec 2015-Dec-2017

Cloud4School is a startup which is a subsidiary of Cloud4Things. My role involves in designing and implementation of their in-house products and services (Android and REST based API development).

- Designed and implemented an app end-to-end called [Srla PrabhupadaLila](#) for **ISKCON Bangalore** from data modelling to REST API development with Kotlin and also consuming them in my mobile app. This is where I can add my value on where we worked on engaging the users to the app and achieved 45% growth in user retention with 5000+ downloads in a span of 2 months.
- Worked on their in house product called **Connect2Parent** - teacher app for the automating the works performed by a teacher in the school such as taking attendance, giving homework, etc.,.

PROJECTS INVOLVED

[Srla Prabhupada Lila \[ISKCON Bangalore\]](#) [Nov 2016 – Dec 2017]

Technologies/Applications used: Android Studio 1.4 ,IntelliJ IDEA Community ,C4t-Platform, Android, Kotlin, Java ,XML,MongoDB , REST API, JSON, Firebase Cloud Messaging(FCM), Google Maps API v2, Picasso library, CarouselView, . .

- Involved in end-to-end Android app development along with backend REST API development and datamodeling of the project as per the agile methodology with 2-weeks release cycle.
- Purpose of the project is to engage users to read the 9500+ pastimes/articles over mobile by providing them with filters such as by location, devotees, qualities and keywords about Srla Prabhupada –Founder of ISKCON.
- Involved in designing the app with social based features such as like/share/view to get the user traction within a span of 2 months with 5000+ downloads.
- Implemented Binary Search algorithm for the Global Search feature to search over huge content of 9500+pastimes/articles in app.
- Involved in data modeling of the articles by tagging them into different types and exported the data to the database from excel sheets given by client by using **JXL Library**.

PERSONAL PROJECTS([GitHub](#))

- [Asphalt Credits](#)- Simulated game play of Asphalt 8 in Java with mouse and key events on particular tracks to earn credits.
- Developed [tic-tac-toe](#) on Android by using MVP, RxJava and Dagger2.

EDUCATION

Sreenidhi Institute of Science and Technology, Hyderabad 72.24%

- Master of Technology in Software Engineering (2013 - 2015)

Gokaraju Rangaraju Institute of Engineering and Technology, Hyderabad 60%

- Bachelor of Technology in Information Technology (2008 - 2012)

PERSONAL INFORMATION

- Languages known : English, Hindi, Kannada and Telugu.
- PAN number : CLPPM6805F.
- Passport No : M2890321.
- Hobbies : Listening to music, watching tech news online through **TheNextWeb.com**.

DECLARATION

I do hereby declare that the particulars of information and facts stated herein above are true, correct and complete to the best of my knowledge and belief.
