SKILLS

- **Programming Languages** : Java, C++, JavaScript, HTML
- **Libraries and Frameworks** : Spring Boot, React, Hibernate
- **Other Skills** : MySQL, Microservices, JPA, REST API

EXPERIENCE

Software Engineer

Dec 2021 - Sep 2023

Tavant

- Built RESTful APIs using Java, Spring Boot, and Hibernate.
- Designed a streamlined MySQL database schema, enhancing data retrieval speed by adding indexes to appropriate fields.
- Worked with both monolithic and microservices architecture.
- Developed a high-performance exception handler using Log4js, improving logging efficiency and response handling.
- Created Web Services that extracts content related data from the database and make it available to the UI.
- Debugged and troubleshoot code related issues/defects to ensure application remained functional and 100% bug-free.
- Designed and implemented the customized exception handling to handle the exceptions in the application.
- Integrated third-party APIs and services to enhance application functionality.
- Designed the application modules, base classes and utility classes using core Java.
- Created JSON requests and response to support the frontend pages as well as third-party .
- Made use of Spring Data JPA to retrieve data from Database.
- Added Pagination to return a Pageable response for the required queries.

Application Developer Associate

Oct 2021 - Dec 2021

Accenture

- Engineered Java applications by implementing design patterns, including Singleton, Builder, and Factory.
- Leveraged Spring and Hibernate frameworks to accelerate development processes.
- Diagnosed and resolved critical issues, enhancing application stability and performance.
- Utilized a robust tech stack, including Java and Spring Boot, to deliver high-quality software solutions.
- Involved in requirements gathering, analysis, design, implementation and testing

Technical Intern

Jul 2020 - Oct 2020

PentaOmnia

- Developing and integrating RESTful APIs with Java Spring.
- Collaborating on database management with MySQL.
- Debugging, testing and optimising features for performance and scalability.
- Writing clean, maintainable, and efficient code under guidance.

PROJECTS

E-Store

<https://github.com/pranav033/E-store-updated>

- Developed RESTful APIs for an E-commerce application using Java, Spring Boot, and Hibernate.
- Implemented pagination to streamline data retrieval, resulting in a ordered retrieval of results.
- Enabled image upload functionality, allowing users to upload images on server.

Hotel Reviewer

- Developed RESTful APIs, using Java, SpringBoot and MySQL, enabling users to review hotels.
- Incorporated microservices architecture, creating independent services for all entities, enhancing system scalability and maintainability.
- Implemented service registry functionality and integrated a unified API gateway.
- Established effective communication between different microservices using Feign client, enhancing inter-service reliability.

NewsRabbit

<https://github.com/pranav033/newsRabbit---react>

- Engineered a news-fetching application using React JS
- Implemented category-wise news fetching functionality, improving content accessibility and user satisfaction.
- Added infinite scroll and top loading bar functionality to enhance the user experience.
- Developed single-page functionality by using React Router, streamlining navigation and reducing load times.

ACHIEVEMENTS

- Data Structures and Algorithms skill certificate by Scaler
- Low Level Design skill certificate by Scaler
- Backend (Java and SpringBoot) skill certificate by Scaler

- Databases and SQL skill certificate by Scaler

EDUCATION

Sir M. Visvesvaraya Institute of Technology

2021

Bachelor of Engineering in Computer Science

SUMMARY

Dynamic and results-driven Full Stack Developer with 2 years of hands-on experience in designing, developing, and deploying enterprise-grade applications using Java, Spring Boot, Hibernate, REST APIs, Angular/React, and MySQL.

I have two years of experience in web development. The gap in my career is due to a major operation I had gone through. The recovery took that much time, so I had to take a break.
