Technical Skills

Languages: Python, Linux, Shell Scripting

Technologies & Tools: AWS, EC2,S3, Terraform, Kubernetes, Docker, GitHub, GitOps

Work Experience

Infosys, Hyderabad

Feb 2022- Dec 2023

Test Engineer

- Collaborated with developers and product managers to reproduce and isolate over **30 bugs** in high-priority features, contributing to a **25% reduction in post-release defects**.
- Improved test coverage by creating and maintaining over **150 test cases**, improving overall testing efficiency by **30%**.
- Actively participated in **Agile Scrum meetings**, providing valuable input to sprint planning and retrospectives, contributing to **15% faster product releases**.
- Conducted thorough **cross-browser testing** to ensure applications perform consistently on major browsers (Chrome, Firefox, Safari, Edge), improving user experience and reducing cross-browser bugs by **35%**.
- Documented test results and communicated effectively with the development team, ensuring clear tracking of defects through **JIRA**, leading to faster issue resolution.
- Detected **20+ critical UI bugs** in the mobile app, contributing to a **15% increase in customer satisfaction** post-launch.
- Responsible for **functional and regression testing** of mobile app updates, ensuring compatibility with both Android and iOS.

Project Work

- **End-to-end CI/CD Implementation- Jenkins:** Implemented end-to-end CI/CD pipeline Java-based applications using Jenkins declarative pipelines. As a part of the pipeline, I have implemented various stages such as Build, Unit Testing, static code analysis, SAST, DAST, creation of Docker images, and Deployment on the Kubernetes platform using Argo CD.
- **Implemented Three Tier Architecture-AWS:** Implemented a three-tier architecture that is highly available and scalable using Terraform and Deployed the application on EC2 instance using user Data script.

AWS components involved: VPC,ASG, Route 53, CDN, ELB, S3, NAT, API Gateway.
- **Cloud Cost optimization - AWS:** Used the combination of AWS Cloud watch and Lambda function to decrease the cloud cost by 30 %. It involved Creating a Lambda function in Python, using the boto3 module to interact with AWS service APIs and cloud watch events to trigger this lambda function

Education

MallaReddy Engineering College

Aug 2016- Sept 2020

Bachelor of Technology (Mechanical Engineering)

CGPA - 9.09

Soft Skills

Analytical Ability, Problem- Solving, Good Communication, Team Work, Decision Making
