OBJECTIVE

Detail-oriented AI Data Evaluator with extensive experience in data annotation, transcription, translation, and response evaluation for AI models. Skilled in assessing AI-generated content, improving chatbot responses, and ensuring linguistic accuracy across Hindi and English. Adept at working with leading AI training platforms and tools, with a strong background in AI model fine-tuning and language processing.

EXPERIENCE

Feb 2022 - May 2024

Software Engineer

Cognizant

Worked on policy-related projects for Liberty Mutual Insurance using mainframe technologies such as JCL, COBOL, VSAM, and DB2. Developed and maintained mainframe-based applications for insurance processing. Optimized data flow and integrated legacy systems to improve efficiency

Remote

May 2024 - Present

AI Data Trainer & Annotator

Alignerr

Conducted extensive data annotation, including text, image, and speech labeling for AI training datasets. Evaluated chatbot responses for coherence, accuracy, and relevance. Provided high-quality feedback on machine-generated text to refine NLP models. Worked as a Coding AI Trainer, training AI models in various programming languages for software development and debugging tasks.

Remote

Jul 2024 - Jan 2025

AI Contributor

OneForma

Translated and transcribed audio, text, and documents between Hindi and English. Ensured data quality and alignment with project requirements. Conducted linguistic evaluation of AI-generated text. Assisted in training NLP models through data curation and annotation. Worked on multiple AI training projects, ensuring high-quality annotations. Reviewed AI-generated responses for accuracy and clarity.

Remote

Dec 2024 - Present

AI Evaluator

Sama

Evaluating Google search queries and AI-generated responses to improve Google Gemini's accuracy and relevance. Analyzing query intent and response quality to enhance the AI model's performance. Providing linguistic and contextual feedback to optimize AI-generated content.
