Personal Projects :

Event Manager (02/2020 - Present)

- **Logistics & Vendors:** Sourcing the venue, catering, AV tech, and decor.
- **Budget Management:** Tracking every cent to ensure the "dream" doesn't outpace the bank account.
- **Timeline Creation:** Building the "run of show" (the minute-by-minute breakdown of the event).
- **On-Site Troubleshooting:** Being the first person to notice the microphone isn't working or the cake is melting, and fixing it before anyone else notices.
- **Soft Skills:** High-Pressure Decision Making, Stakeholder Communication.
- **Tech:** Event Management Software (Cvent, Eventbrite, Whova), CRM, Excel.

Navigation to Examination Hall Integrated with Candidate Authentication,Thermal Screening & Attendance Monitoring (2021)

- There are many issues faced by the students during attending the examination. Navigating to the examination hall is also a major problem faced by students. Therefore I have introduced a navigation system where the students can easily identify their respective examination hall using RFID tags.
- The usage of biometric helps the student to guarantee his authenticity. Once the authenticity is verified only then the student is allowed into the examination Hall. If the authenticity is not verified then there is an alarm that is sent to the examination controller.
- In this situation of pandemic thermal screening is performed for every candidate who enters the examination Hall. The result of the thermal screening is going to decide whether the candidate is allowed to the examination Hall or not
