## PROFILE

A computer enthusiast seeking a software engineering role in a dynamic, performance-driven environment. Adept at leveraging cutting-edge technologies and methodologies to deliver innovative solutions. Proficient in software development, data analysis, and machine learning.

## EXPERIENCE

### Internship | InDataAi

Nov 2023 to Dec 2023

- Developed predictive models for Titanic survival using Python, Pandas, and NumPy.
- Implemented machine learning algorithms, including CNN and DenseNet, to enhance predictive accuracy.
- Leveraged Django for web application development.

### Intern | SOC Experts

Aug 2023 to Oct 2023

- Designed and implemented user-facing features using React.js.
- Developed reusable and optimized components for performance across multiple devices and browsers.

## EDUCATION & QUALIFICATIONS

### Masters of Computer Applications | KLE IT Hubli

2021 - 2023

Graduated with Distinction, CGPA: 8.6

### Bachelors in Computer Applications | KLE's PC JABIN COLLEGE Hubli

2018 - 2021

Graduated with Distinction, CGPA: 7.6

## SKILLS

- Programming Languages: Python, Java
- Machine Learning: Convolutional Neural Networks (CNN), DenseNet, InceptionV3, ResNet-50
- Data Analysis: Pandas, NumPy, Matplotlib
- Web Development: HTML, CSS, JavaScript, React.js.
- Database Management: MySQL, Oracle
- Tools & Libraries: VS Code, PyCharm, Jupyter Notebook, Power BI
- Operating Systems: Linux/UNIX.

## PROJECTS

### Diabetic Retinopathy Detection Using ML

- Applied CNN and DenseNet for medical image analysis to detect diabetic retinopathy.
- Tools: Python, CNN, DenseNet, InceptionV3.

### IMDB Web Scrapping using Python

- Extracted and analyzed movie data and ratings using Beautiful Soup and requests.
- Tools: Python.

### Smart Dustbin using IOT

- Developed an IoT-enabled smart dustbin with sensors for waste management.
- Tools: C, Arduino Uno, Ultrasonic sensor, HC-SR04, SG-90 micro servo motor.

### Online Food Ordering System using PHP and Web Technology

- Implemented a web-based food ordering system with browsing and ordering capabilities.
- Technologies: PHP, HTML/CSS, SQL.

## ACHIEVEMENTS

- Student Placement Coordinator, MCA Department (2021-2023)
- Participant in New India Learnathon 2020, ICT Academy
- Event Coordinator for Coding in Advitiya 2022 National Level Tech Fest

## CERTIFICATIONS

- Introduction to Data Analytics by Simplilearn
- Introduction to Cloud Computing by Simplilearn
- Python 101 for Data Science
- SQL and Relational Databases 101 by IBM
