EDUCATION

GLA University

Bachelor of Technology in Computer Science & Engineering

Mathura, UP

Aug. 2018 – June 2022

Mahatma Hansraj Modern School

Higher Secondary School

Jhansi, UP

Jan. 2017 – June 2018

EXPERIENCE

Cloud Engineer Intern

Unicloud Labs Pvt Ltd

June 2024 – Present

Noida, UP

- Engineered and optimized cloud infrastructure on cloud platform AWS & OCI by deploying and managing EC2 instances, S3 storage solutions, and custom network configurations to drive performance and scalability.
- Created and refined comprehensive BOQs and architecture diagrams for strategic project planning and accurate cost estimation, enhancing transparency and improving project budgeting accuracy.
- Resolved customer challenges through direct, solution-focused interactions, adeptly identifying needs, diagnosing issues, and delivering customized solutions that boosted customer satisfaction and system reliability.
- Designed and upheld robust monitoring frameworks using open-source tools like Nagios and Wazuh, securing consistent system uptime and strengthening infrastructure security.
- Enhanced performance efficiency by proactively monitoring RDS databases to identify and resolve CPU-intensive or unoptimized SQL queries, leading to improved database responsiveness and resource optimization.

Cloud Intern

Fluidech IT Services Pvt Ltd

Oct 2021 – Mar 2022

Gurugram, Haryana

- Leveraged AWS Elastic Beanstalk to deploy and manage scalable web applications, gaining hands-on experience with cloud deployment technologies.
- Collaborated with cross-functional teams to configure, deploy, and monitor web applications using Elastic Beanstalk, ensuring seamless integration with AWS services.
- Provided technical support to internal teams and clients, resolving infrastructure issues and optimizing cloud resources.

PROJECTS

Scalable, Secure Government Website Deployment on AWS

June 2024 – Present

- Optimized scalability** by implementing Auto Scaling and Lambda functions to dynamically manage infrastructure load, ensuring efficient resource allocation during peak times.
- Established proactive monitoring** with custom thresholds, enabling real-time alerts to stakeholders to maintain infrastructure health and performance.
- Built fault-tolerant infrastructure** with multi-AZ and multi-region deployments, minimizing downtime and ensuring high availability for critical services.
- Provided seamless support** by handling daily customer interactions, enabling smooth code deployments and maintaining website reliability and functionality.

On-Prem VM Migration to OCI with HA & Security

June 2024 – Present

- Migrated on-premises VMs to OCI** using a hub-and-spoke model to enhance security and streamline network management.
- Implemented robust security measures** by deploying OCI security services, Trend Micro antivirus, and Veeam backups, ensuring file-level recovery and protection against cyber threats.
- Enhanced incident management and compliance** with Wazuh as a SIEM tool, enabling real-time monitoring and alignment with compliance standards.
- Ensured high availability** through Disaster Recovery (DR) strategies and fault domains within regions, minimizing downtime and safeguarding critical infrastructure.

TECHNICAL SKILLS

Cloud Platform: AWS, OCI

AWS Cloud Services: EC2, VPC, IAM, S3, CloudFront, WAF, LoadBalancer, RDS, CloudWatch, SNS, SecurityHub, Config

OCI Cloud Services: Instance, VCN, Notification, LoadBalancer, CloudGuard, FastConnect, Bucket, WAF

Operating Systems: Linux (Ubuntu, CentOS, RedHat), Windows

Programming & Scripting: Python, Bash

Networking: TCP/IP, DNS, VPC Configuration, Security Groups

Database: SQL

Monitoring: Nagios

Security: Wazuh, ELK
