

Pratik Dhane

Software Engineer with extensive **4+** years of experience in the customization of CAD software and automation processes (Batch Application). Proficient in enhancing and optimizing workflows across various CAD platforms, including SolidWorks, CATIA, Inventor, AutoCAD, Civil 3D, Navisworks, and client-specific CAD solutions. Adept at integrating automation tools to streamline design processes, improve efficiency, and ensure precision in complex engineering projects. Known for delivering tailored solutions that meet the unique needs of clients, driving innovation, and improving operational performance.

Location

Satara, Maharashtra

Phone

9623068144 / 7620821867

Email

pratikdhaneasmi@gmail.com

Skillset

Languages : C++, C#, Python(Basic), VB.net

Frameworks : QT5(with C++), Win Form(with C++, C#), PyQt5 & PySide2 (with Python)

Application APIs for Automation and Customization : Inventor, AutoCAD, Civil3D, Navisworks, Solidworks.

Other : OOPs, STL, Data Structures, Algorithms, Git, Source control, Geometry application, Workflow definition, Batch application, Debugging.

Characteristics

- Proficient in English, Marathi, Hindi communication.
- Understanding client's requirement and documentation followed by doubt clarification.
- Defining Scope of Work and timeline
- Leading team and providing healthy environment for growth.
- Open for learning and development

Experience – 4+ years

25 September 2023 – 10 August 2024

Software Engineer | Agreeya Solution Pvt Ltd (On Site - Amdocs India Pvt. Ltd) | Pune, Maharashtra

- Developed and deployed seven custom automation tools using AutoCAD .Net to streamline design workflows for AT&T's drafting requirements, including road layouts, utility layouts, and traffic control plans (Tools : AutoLayout Permit, AutoLayout TCP, Utility lines, AutoDimensions, Cleaning and beautification, Attributes AutoMLeader, Adding and retrieving Metadata)

11 October 2022 – 25 September 2023

Member Of Technical Staff | Centre for Computational Technologies Pvt. Ltd | Pune, Maharashtra

- Developed a tool in Inventor for detecting holes in models, calculating machining time, and estimating manufacturing costs.
- Created a system in Navisworks to analyse and restructure piping systems in manufacturing and chemical plants by mapping pipe networks and section coordinates.
- Led a team of developers and QA for the Civil3D Connector project, integrating Civil3D objects into Autodesk's ACC cloud service. Served as Scrum Master, overseeing key workflows and development.
- Consulted on the AutoCAD Connector project, leveraging expertise from the Civil3D Connector to achieve project goals using similar technologies

July 2020 – 11 October 2022

Software Engineer | CAD Vision Engineers Pvt Ltd | Hyderabad, Telangana

- Developed an automation tool in Inventor to assemble components based on user inputs, generate drawings with views and dimensions, and automatically update title blocks with author details.
- Led bug fixing and tool migration from MFC to Qt5 for a client's CAD software, creating new dialogs and mapping functionalities, resulting in a stable and well-received final product.
- Designed an interface in PyQt5/PySide2 for viewing, filtering, and graphing export data from the client's CAD system, compatible with both Ubuntu and Windows.
- Developed a batch application in SolidWorks for creating and assembling medical implants used in shoulder surgeries, automating complex manufacturing steps

Awards and Achievements

- 2021 | Got an annual award for "Customer Focused Approach" segment.

Education

- B.Tech: Mechanical Engineering – 2020 | NIT, Andhra Pradesh | 7.64 CGPA
- 12th | 2016 | Science | 81.85%
- 10th | 2014 | Science | 94.00%
