## Professional Summary

Accomplished and results-driven **QA Automation Engineer** with 4.5+ years of experience specializing in **UI and backend automation testing**. Proficient in crafting scalable automation frameworks using **Java, Selenium, Appium**, and **BDD frameworks**. Skilled in manual and automated testing, **cloud-based tools** like Jenkins, AWS, and Lambda Test, and **SEO automation**. Passionate about exploring new technologies to streamline testing and improve software performance.

## Technical Skills

- **Automation Testing:** Selenium, Appium, REST Assured, Maven
- **Programming Languages:** Java, Python
- **Test Frameworks:** TestNG, Cucumber BDD, Pytest
- **Cloud-Based Tools:** Jenkins, AWS, Lambda Test
- **Manual Testing:** Functional, Non-Functional, Regression, Sanity Testing
- **SEO Automation:** Open Graph/meta tag validation, performance optimization
- **Database Testing:** SQL
- **Tools & Technologies:** IntelliJ IDEA, Eclipse, Git, JIRA, Postman

## Education Qualification

**Bachelor of Engineering (B.E.)**  
JSPM College | October 2020

## Work Experience

**QA Automation Engineer**

**Lyca Digital | Bengaluru, India**  
**Mar 2024 – Present**

- Developed and maintained UI automation frameworks with **Selenium and Java**, achieving **95% regression test coverage**.
- Built reusable frameworks using **Cucumber BDD**, streamlining testing processes.

- Spearheaded **SEO automation** to validate Open Graph and meta tags, improving compliance and efficiency by **80%**.
  - Automated mobile testing with **Appium**, ensuring cross-platform compatibility.
  - Reduced test execution time by **40%** using **Lambda Test** for parallel and cross-browser testing.
  - Integrated automation scripts into **Jenkins CI/CD pipelines**, optimizing reporting cycles.
  - Conducted in-depth **SQL database testing** to validate backend data accuracy.
- 

### Test Analyst (Senior Engineer)

**Kolonizer Real Business | Bhopal, India**  
**Dec 2022 – Feb 2024**

- Introduced the first automation framework, reducing manual testing efforts and earning the **Automation Champ Award**.
  - Automated **REST API testing** using **REST Assured** for seamless backend integration.
  - Conducted manual sanity, regression, and exploratory testing, identifying critical issues early.
  - Proficient experience in **Test Case Design, Test Execution, Bug tracking**.
  - Good experience of OOPS concepts, **Array, String Class**, and **core JAVA** and **PYTHON**.
  - Experience in writing clear, concise and comprehensive **test cases**.
- 

### QA Engineer

**Universal Nine | Pune, India**  
**Jun 2020 – Nov 2022**

- Automated web applications with **Selenium**, improving release speed and reducing manual effort.
- Conducted functional and regression testing, enhancing software robustness.
- Validated REST APIs with **Postman**, ensuring accurate data transactions.
- Performed **SQL-based database validations** for critical applications.

## Achievements and Awards

- **Best Automation Engineer Award** at Lyca Digital for contributions to Selenium and Appium automation.
- Recognized for delivering a scalable **SEO Automation Framework**, increasing compliance by **80%**.
- **Automation Champ Award** at Kolonizer for implementing the company's first automation framework.

## Key Projects

- **SEO Automation Framework:** Automated Open Graph/meta tag validation for 5,000+ URLs, improving SEO performance by **80%**.
- **Telecommunication Domain Automation Suite:** Built a UI automation framework, reducing release cycles by **50%**.
- **Cloud-Based Automation:** Leveraged **Lambda Test** for cross-browser testing, integrated with Jenkins CI/CD pipelines.
- **Mobile Testing Framework:** Designed an Appium-based framework for telecommunication and real estate apps.
- **Web Automation Framework:** Created robust Selenium-based frameworks, ensuring scalability across industries.

## Personal details

- **Date of Birth :** 01 Jan 1997
- **Marital Status :** Single
- **Nationality:** Indian
