

# Pratiksha Sahu

Bangalore, India | 9669574518 | pratikshasahu9909@gmail.com | [LinkedIn](#)

## SUMMARY

Over 2 years (JUL 2022 - PRESENT) of experience specializing in data analysis, reporting and business intelligence. Proven expertise in SQL and BI reporting tools, with hands-on experience extracting insights from complex datasets. Strong analytical skills and contributing to data-driven decision-making.

## SKILLS

- Microsoft Excel | Python | NumPy | Pandas | Seaborn | Matplotlib | SQL | Hypothesis Testing | Statistics | Oracle RDBMS | Data Analysis | Data Manipulation | Microsoft Power BI | Problem Solving | Analytical Thinking | Communication | Critical Thinking

## EXPERIENCE

- Extensive experience handling large datasets, performing data extraction, transformation, and analysis to derive actionable insights for business decisions.
- Proficient in SQL for querying, retrieving and analysing data from complex databases across various business modules, including HR, Absence.
- Built and optimized BI reports to streamline reporting processes and deliver actionable insights to stakeholders.
- Collaborated with cross-functional teams to troubleshoot and resolve issues related to reporting and data workflows, enhancing operational efficiency.
- Participated in system upgrade testing, validating data accuracy and consistency across critical interfaces.
- Authored detailed technical documentation to support the implementation of new reporting components and ensure compliance with business requirements.
- Experienced in writing complex SQL select queries (window functions and CTEs) with advanced SQL experience.
- Strong in querying logic and data interpretation.
- Solid communication and articulation skills.

## PROJECTS

### 1. Candidate Image Integration (DTCC)

Bengaluru, India  
May'24 – Nov'24

#### Skills :- SQL

- Developed a report based on SQL query for the client.
- Wrote SQL query using subquery to get the desired output and to meet the specific condition.
- Worked with many tables, performed joins & apply many conditions for the where clause.
- This solution gives 100% accuracy result to the stakeholders.

### 2. Offboarding Compliance Dashboard (DTCC)

Bengaluru, India  
Jan'24 – Nov'24

#### Skills :- Power BI

- Developed a dashboard to report on compliance monitoring for late termination process/controls and effective interface execution.
- It has created on top of gold source of employee and contingent worker offboarding data which store and manage all relevant meta data used for HR & Insider Risk Off Boarding Compliance and incident management.
- It has analytics & metrics to provide insight on compliance and non-compliance trends.

### 3. HR Attrition Analysis Dashboard (Power BI): | [LINK](#)

- Tools: Power BI**
- Developed an interactive HR Analytics Dashboard to track attrition trends using Power BI.
- Created visualizations such as pie charts for attrition by education, column charts for attrition by age, and bar charts for salary slab and job role analysis.
- Integrated KPIs, tooltips, and Q&A insights for detailed analysis.
- Added homepage bookmarks, back-button functionality, and parameterized X-axis selection for user customization.

### 4. Linear Regression for Car Sales Prediction: | [LINK](#)

- Tools: Python (Pandas, NumPy, Matplotlib)**
- Built a linear regression model to predict car sales based on features like price, engine size, and horsepower.
- Performed data cleaning, EDA, and feature selection, handled missing values and checked for multicollinearity.
- Split data into train-test sets, predicted sales, and evaluated performance using model accuracy, decile analysis, and regression assumptions.
- Suggested improvements to enhance prediction accuracy.

## CERTIFICATIONS

- SQL: A Practical Introduction for Querying Databases by Coursera** | [LINK](#)
- Data Analysis and Visualization with Power BI by Coursera** | [LINK](#)

## EDUCATION

**Bachelor of Engineering - Computer Science and Engineering (2018 - 2022)**

Shri Shankaracharya Engineering College (SSEC), Chhattisgarh
