

PRAVEEN KUMAR JHA

UiPath developer with team management expertise

+91 7678607364 New Delhi
Praveenjha82email@gmail.com

EXPERIENCE

9 Years 11 Months

NOTICE PERIOD

Immediate Joiner

UiPath Relevant Exp.

6+ years with team management

Preferred Location: Anywhere

Education: M.Sc. (CS), 2007

UiPath automation professional with managing complex UiPath projects. Expert in architecting and deploying scalable automation solutions, designing advanced workflows, and proven ability to optimize business processes, enhance operational efficiency, and drive continuous improvement through detailed process analysis and solution enhancements. Skilled in creating comprehensive technical documentation like As-is and To-be, ensuring adherence to the best practices, and maintaining high standards of quality and compliance. Collaborating with stakeholders, managing cross-functional integrations, and delivering client-focused solutions. Proficient in Agile, DevOps and SRE methodologies, with a solid background in optimizing UiPath Orchestrator management and applying ITIL and security standards for innovative automation solutions.

Independent/ Freelancing work Sep 2021 - Present

UiPath Automation

- Utilized UiPath's web scraping feature to extract real-time NSE data for 185 instruments, creating a cost-effective solution that eliminates the need for vendor payment.
- Developed a UiPath automation to track and monitor instrument price fluctuations of 500 points up or down. When the price moves within a 0.5% range, the automation instantly suggests potential movements with associated risk percentages. This solution has accelerated decision-making by 50% in the crucial last 30 seconds before placing an order.
- Designed a UiPath automation that efficiently places orders with optimal speed, precise timing, and at the lowest possible cost. This solution not only eliminated the need for API subscription fees but also safeguarded each order against potential downside risks.
- Developed a UiPath automation with a daily time trigger at 3 PM to analyse four weeks of volume data, along with the current month's data, for over 500 instruments. The automation generates a list of potentially profitable instruments for the following day, week, or month.
- Developed a performance monitoring dashboard to track UiPath automation activities, enabling the identification of improvement areas and facilitating necessary adjustments.
- Created a fallback UiPath automation to retrieve data from the NSE website and promptly close all active positions upon receiving client confirmation via email.
- Developed a Python-based fallback automation to monitor UiPath's MySQL database updates. If no updates are detected within 5 minutes, the system triggers an immediate voice and visual alert on the dashboard.

Web application development

- Design and developed web applications using WAMP (Data feed received from UiPath automation)
- Created web interfaces to analyse NSE Jason data in a meaningful and tradable format directly by human. (Fallback approach)
- Maintained high performance, reliability and responsiveness of web application.

SKILLS EARNED

- UiPath Automaton.
- Computer Vision AI
- OCR
- Automation discovery.
- Automation engineering.
- Manual process analysis.
- PDD and SDD documentation.
- Stakeholder collaboration.
- Frequent interaction with international users.
- RE Framework
- Orchestrator.
- Web Data Scraping.
- Desktop automation.
- Web automation.
- Email automation.
- Process automation.
- Real-time data processing.
- Able to work in a high-pressure situation.
- Fallback planning.
- Workflow testing.
- UAT.
- Test automation
- Coding standards.
- Team management.
- Independently run project.
- Dashboard designing.
- Performance monitoring and improvement
- Jira (Defect Tracking)
- SNOW (Incidents)
- Data Analysis.
- Power Automate (Elementary)
- Python
- PHP
- SQL
- HTML, CSS, Java Script.
- DevOps.
- SRE Understanding.
- 24/7 work environment
- Incident management
- ITIL

Corporate UiPath Automaton experience

ALLEGIS GROUP TEKSYSTEMS INDIA PVT. LTD.

Lead Conferencing Operations (Jul'19 – Sep'21) Client Adobe Systems (Noida)

ADOBE SYSTEMS

Environment Stability Engineer (Jul'15 – Jul'19)

NOC Engineer (Jul'12 – Jun'15)

WIPRO INFOTECH: Nov'11 – July'12

Sr. Network Management (Gurugram)

Team management

- Provided guidance and support to member developers to boost team skills and fostering professional growth.
- Led team in delivering UiPath RPA solutions, ensuring technical standards and project requirements are obeyed.
- Implemented knowledge transfer to elevate team competencies and streamline UiPath development processes.

RPA UiPath Development and Deployment

- Conducted detailed architectural evaluations, led the development, testing, and deployment of RPA projects using UiPath, ensuring robust and scalable solutions.
- Designed, developed, and tested automation workflows with a focus on reusability and performance optimization, integrating seamlessly with enterprise systems.

Process Optimization and Automation

- Conducted thorough process analyses to identify automation opportunities using UiPath and driving improvements in operational efficiency and accuracy.
- Conducted regular reviews and optimizations of UiPath automated processes, implementing improvements that enhanced productivity and minimized downtime.
- Identified and implemented process improvements, leveraging UiPath automation to streamline workflows and reduce manual intervention.

Technical Documentation and Standards

- Created detailed PDDs, SDDs, technical design documents (AS-is and To-be), and support plans, ensuring clarity and consistency in UiPath RPA implementations.
- Ensured adherence to coding standards, security protocols, and best practices, minimizing risks and enhancing the reliability of RPA solutions.
- Standardized documentation practices to facilitate smooth UiPath project execution and effective.
- Communication among stakeholders.

Stakeholder Collaboration and Solution Design

- Collaborated with stakeholders to identify automation needs and document requirements, aligning UiPath RPA solutions with business objectives.
- Worked with cross-functional teams to translate solutions into practical implementations, ensuring minimal disruption to existing systems.

Performance Monitoring and Compliance

- Monitored the performance of automated processes, implementing monitoring and troubleshooting measures to ensure optimal reliability and stability.
- Participated in audits and compliance reviews, ensuring that UiPath RPA automation solutions adhered to regulatory requirements and quality standards.
- Using Jira to track defects and triage accordingly.

Technical Proficiency and Integration

- Created own custom UiPath activities and libraries to address specific business needs, extending the functionality of automation solutions.
- Utilized expertise in ITIL Service operation (Incident management), DevOps, and SRE standards to guide UiPath automation projects, incorporating cognitive automation for innovative solutions.

Agile, waterfall and DevOps Methodologies

- Applied Agile, Waterfall and DevOps methodologies to streamline UiPath RPA project management, accelerating deployment cycles and improving responsiveness.
- Managed and optimized UiPath Orchestrator queues, ensuring efficient processing and monitoring of automation workflows.

PROJECT DONE AND TIME SAVED SUMMARY

UiPath projects completed (Received IT Appreciate award)	Result achieved through UiPath process automation
Daily conference room audit	Completely eliminated human intervention, saved an average of 4.5 hours daily.
Minimized manual work for Level 1 tasks	Achieved 5% quarter-over-quarter reduction in L1 tasks for the Noida location.
Automated self-healing process to allow L2 engineers to focus on more strategic and productive tasks.	Designed and implemented UiPath automation to monitor dashboards, automatically triggering specific incident-related automation and executing action as directed by the L2 team. This solution reduces the weekly workload by approximately 15 hours, resulting in a 28% increase in efficiency.
Subscription Renewal	Automated approximately 150,000 subscription jobs in each quarter to ensure smooth operation of pre-production order processing. This UiPath automation has prevented at least four production critical incidents during quarterly financial assessments period.
Cisco Mx configuration push	Implemented automation to configure Cisco MX devices globally. This UiPath automation has reduced manual effort by approximately 280 hours.
Call Manager configuration	Implemented UiPath automation to configure Cisco call manager to setup IP phones. This UiPath automation has removed 100% human effort.
Digital Employee	Under this UiPath automation, ideal was to gradually grab verities of conferencing team work like email management, read Splunk dashboard, assist in troubleshooting, etc. and let team focus on more creative work.
Adoe order flow user experience	Automated www.adobe.com order flow for various products like Photoshop, Acrobat, Lightroom and Premiere Pro. This UiPath automation has predicted the bad customer experience and potential revenue impacting event.
