Objective

Highly motivated and results-driven graduate with a strong foundation in AWS and web development. Seeking an opportunity to work in a dynamic environment where I can leverage my technical skills and drive for excellence to contribute to the success of the team and organization.

Skills

- **Programming Languages:** Python, Java
- **Cloud Technologies:** AWS (EC2, S3, Lambda, RDS, VPC, IAM, CloudWatch, DynamoDB etc.)
- **Frontend Technologies:** HTML, CSS, JavaScript
- **Databases:** MySQL

Projects

VPC Design and Network Setup on AWS

- **Technologies Used:** AWS VPC, EC2, Security Groups, Route 53
- Designed a multi-tier VPC architecture with public and private subnets, and launched EC2 instances in separate subnets to simulate a web application and its database setup.
- Implemented AWS Security Groups and Route 53 for DNS management to secure the network and ensure proper communication between application components.

Portfolio Website

- **Technologies Used:** HTML, CSS, JS
- Designed and developed portfolio website using HTML, CSS and JavaScript to showcase projects, skills, and achievements.
- Implemented responsive design with sections including project showcases, services provide, contact form, and interactive UI elements.

Music Streaming Website

- **Technologies Used:** HTML, CSS
- Designed and developed a music streaming website using HTML and CSS, focusing on user-friendly design and responsive layout.
- Contains music player bar, podcast browser, search option for searching songs. Contains buttons for exploring premium, installing app, playlists for listening to music
