Education

Arya College of Engineering & IT, Jaipur | Affiliated to Rajasthan Technical University, Kota 2020 - 2024
Bachelor of Technology in **Computer Science & Engineering** | CGPA - **9.38/10** | Qualified **GATE** 2024

Experience

Web Developer Intern | Celebal Technologies, Jaipur

- Completed a 3 months Web Development Internship and achieved recognition for outstanding performance.
- Collaborated with a team to design and implement web applications using JavaScript, React, and Node.js, ensuring smooth and efficient user experiences.

Projects

QuickBites - Food Ordering Platform [[Live](#)][[GitHub](#)]

- Tech Stack** - TypeScript, React, Node.js, Express.js, MongoDB, Tailwind, OAuth, JWT
- Overview** - Developed a scalable and responsive food ordering platform using the **MERN** stack.
- Authentication** - Integrated **Auth0** for secure authentication across multiple user roles, improving data security.
- Database** - Used MongoDB for managing orders and user data, enhancing data retrieval efficiency.
- API & Backend** - Developed **RESTful APIs** for order processing, user management, and restaurant operations.
- Payment** - Streamlined payment flow with **Stripe** integration, boosting checkout conversion rates.
- Frontend** - Built the responsive frontend with **React** and **Tailwind** CSS, implementing **searching, sorting, and pagination** functionality for enhanced user experience.
- Deployment** - Deployed the platform on Render, ensuring high availability and smooth performance for users.

Spring Boot Microservices - Online Shop [[Github](#)]

- Tech Stack** - Java, Spring Boot, MongoDB, MySQL, Maven, Kafka, Keycloak, Resilience4J, Docker
- Overview** - Developed a scalable **microservices architecture** for an online shop using Spring Boot, including Product, Order, Inventory, and Notification Services, with an API Gateway for routing and load balancing.
- Authentication** - Integrated **Keycloak** for centralized authentication, enhancing security.
- Database** - Utilized MongoDB for product data and MySQL for order management, optimizing data retrieval.
- API Gateway** - Integrated API Gateway with **Spring Cloud** Gateway for routing & load balancing, reducing latency.
- Communication & Resilience** - Configured **Kafka** for asynchronous service communication and applied **Resilience4J** for fault tolerance.
- Testing & Monitoring** - Simulated external dependencies with Test Containers and Wiremock, while implementing **Grafana Stack** for service health monitoring.

Certifications & Achievements

- Achieved **All India Rank 655** in CodeKaze 2024 by Coding Ninjas, competing among **150,000+** participants. 
- Secured **1st runner-up** at the AI Hackathon hosted by **SoftServ INC** on a real time industry problem. 
- Attained top **2%** national & top **1%** Institute ranking in CoCubes National Assessment 2023 by **AON**. 
- Demonstrated proficiency in Linux by completing **RHCSA** Certification (286/300). 

Skills

Programming Lang - C++, JavaScript, Java, TypeScript | Frontend - HTML, CSS, React | Databases - MongoDB, MySQL
Backend - Node.js, Express.js, Spring Boot, REST APIs, Microservices
Others - Data Structures, Algorithms, OOPs, Linux, Git, Docker, AWS
