Technical Skills

Programming Languages and DataBases: C++, Python, Java, MySQL, Oracle SQL, Bash Scripting

Cloud SDK/API: Microsoft Azure, Amazon Web Services AWS, Oracle Cloud Infrastructure OCI, Google Cloud Platform GCP

Design: Data Structures and algorithms, Design Patterns, Object oriented programming OOPS, Low level System Design

DevOps Tools and Utilities: Git/GitHub, Assembla (Version Control), Jenkins (CI/CD Automation), Jira (Collaboration Software) Google Protocol Buffers (Protobuf - Data serialization), Application Program Interface APIs Integration.

Soft Skills: Strong Analytical and problem solving skills, Excellent communication and collaboration skills.

Work Experience

RackWare Inc.

April 2023 – Present

Software Engineer

Pune, India

- Implemented Azure Python APIs in RMM to create Azure VM Instances with key management, disk type selection, availability options, and custom images for Windows and Linux OS, increasing deployment efficiency by 30%.
- Enhanced RMM's Windows Installer using Win32 APIs and revamped logic for non-English Windows users, improving accessibility for over 500 global users.
- Optimized RMM installation for RHEL/CentOS 8.x OS versions, reducing installation time by 40%.
- Set up Jenkins automation pipelines for building the RMM Installer for various branches on every new commit, reducing build times by 50%.
- Resolved cross-cloud migration issues across Azure, OCI, AWS, GCP, and VMware environments, improving cross-cloud compatibility by 20%.
- Revamped the VM size selection algorithm to dynamically allocate VM sizes based on source cores and RAM, improving resource allocation efficiency by 20%.

Vodafone Intelligent Solutions _VOIS

October 2021 – April 2023

Senior Executive

Pune, India

- Drove operational efficiency by leading application analysis and CSM team operations for Vodafone Germany, resulting in a 33% productivity surge and €500k in incremental revenue.
- Developed and implemented C++, SQL, and front-end solutions for internal tools and portals, reducing incident volume by 25% through automation.
- Managed critical applications (service provisioning, voucher management, SIM number management, KIAS 2000), ensuring 99.9% uptime and uninterrupted service continuity across key operations.
- Optimized revenue generation by designing and implementing SQL procedures and web services, significantly mitigating data discrepancies.
- Established robust incident management processes, reducing resolution time by 25% and improving customer satisfaction.

Internships

Pepcoding Education Pvt. Ltd.

February 2021 - August 2021

Web Developer

Noida, India

- Developed and deployed a responsive educational platform using Python (Django) and React, which increased user engagement by 40% through improved UI/UX and performance optimizations.
- Integrated RESTful APIs for dynamic content delivery and real-time updates, reducing page load times by 35% and enhancing the overall user experience.
- Collaborated with a team of 4 developers to implement secure authentication systems and optimized database queries, reducing server response times by 20% and improving data retrieval efficiency.
