WORK EXPERIENCE

Software Engineer

Cisco, Project NCS1010

04/2023 - Present

Bengaluru

Achievements/Tasks

- Engineered and maintained the NCS 1010 amplifier product, focusing on the data path for various line cards, utilizing Dense Wavelength Division Multiplexing (DWDM) Technologies.
- Developed and optimized C code for data path operations, ensuring high performance and reliability.
- Utilized GDB for in-depth debugging of complex issues, such as memory corruption, segmentation faults, and performance bottlenecks.
- Collected and analyzed showtech logs and core dumps to diagnose and troubleshoot issues within the DWDM data path.
- Employed Valgrind for thorough memory checks, identifying and resolving memory leaks and other memory-related issues.
- Utilized Netconfig for setting configurations for devices, ensuring proper setup and operation of network components.
- Collaborated with cross-functional teams, including firmware, hardware, and QA, to gather requirements and deliver comprehensive technical solutions for DWDM line cards.
- Managed source code and version control using Git and Bitbucket, including creating, reviewing, and merging Pull Requests (PRs).
- Optimized data path components, resulting in significant performance improvements and increased system reliability.
- Received 'Habit Flagbearer - Being Responsive award' for my work.

Software Engineer

Verifone, Project Vericentre

06/2022 - 03/2023

Bengaluru

Achievements/Tasks

- Maintaining payment solution for client, Verifone using C, C++ and by using agile methods for software development.
- Build SQL script to install VeriCenter and add its services.
- Design and develop MSI installer packages for various Point of Sale (POS) devices, ensuring compatibility and smooth installation processes.
- Investigate and address Jira tickets raised by clients promptly, providing effective solutions to reported problems related to USB devices, installation, or configuration.
- Managed the addition of SSL certificates to address server expiration issues and security concerns.
- Received 'Victory League award' as a team for our support and work to the client.

EDUCATION

Bachelor of Technology

National Institute of Science and Technology, Berhampur

08/2018 - 07/2022

8.8/10 GPA

Courses

- Computer Science and Engineering

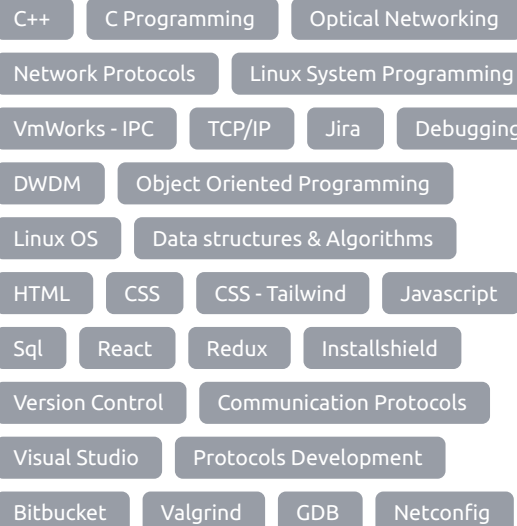

Intermediate

ADLS Sunshine School, Kadma

04/2017 - 04/2018

83.16%

SKILLS & TOOLS

PERSONAL PROJECTS

Weather App

- Created a responsive weather app with HTML, CSS, and JavaScript, delivering real-time weather updates and demonstrating front-end development expertise.

Tic Toe Game

- Designed and developed a web-based tic-tac-toe game using HTML, CSS, and JavaScript, showcasing front-end development skills and interactive web application design.

E-Card

- Created an e-commerce site using HTML, CSS, JavaScript, and React. It presents a range of products, enabling users to add items to a cart and remove them from the cart page.

CERTIFICATES

AWS Partner: Generative AI on AWS Essentials (Business) (08/2023 - 08/2023)

Certification Course Introduction to Oracle 11g:SQL summer course at NIST (05/2019 - 06/2019)

PJP program in JAVA/J2EE at Wipro Limited. (03/2022 - 05/2022)

ORGANIZATIONS

Wipro Limited (05/2022 - Present)
