SUMMARY

Analytical and detail-oriented Computer Science graduate with a B.Tech from Adamas University, Kolkata. Gained hands on experience as an Apprentice, Intern, Industrial Training with a focus on data extraction, visualization, and modeling. Skills in Python, SQL, Excel, Power BI and data analysis tools. Seeking to leverage technical expertise and practical skills in a challenging role to drive data-informed decision-making and process optimization.

SKILLS

Programming & Data Analysis Tools: Python (Pandas, NumPy), Excel

Data Visualization: Power BI, Matplotlib, Seaborn, DAX

Database Management: MySQL

Software & Tools: Jupyter Notebooks, Microsoft Office (Excel, PowerPoint)

KEY STRENGTHS

Data Extraction & ETL Processes

Data Visualization & Reporting

Data Modeling & Analysis

Analytical Thinking & Problem-Solving

Effective Communication & Presentation

Team Collaboration & Multi-tasking

CERTIFICATES

Certified AWS Cloud Practitioner :
Conducted by EXL,CCDT & Edubridge

Excel Essential Training (Microsoft 365) :
LinkedIn Learning

Excel: VLOOKUP and XLOOKUP for Beginners: LinkedIn Learning

Power BI Essential Training: LinkedIn Learning

Data Analytics Essentials: Issued by Cisco

EDUCATION

B.Tech (C.S.E)

Adamas University
07/2022 | Kolkata, India
CGPA:7.14

PCMB

Ang Rise Institute
05/2018
Percentage:68

PCM

D.A.V Public School
05/2015
CGPA:6.6

EXPERIENCE

Fujitsu Consulting India Pvt Ltd

Apprentice, Intern, and Industrial Placement
06/2023 – 06/2024 | Bangalore, India

- Conducted data analysis using Python for insights.
- Utilized Pandas and NumPy for effective data manipulation.
- Developed interactive dashboards and reports in Power BI.
- Created and maintained complex Excel spreadsheets for data tracking.
- Identified areas for process improvement and implemented optimization strategies.

PROJECTS

Sales Data Analysis Project

- Analyzed sales data using Python and Pandas to identify trends and patterns.
- Created visualizations with Matplotlib to effectively present findings.
- Enhanced data reporting accuracy and efficiency, supporting data-driven decision-making

Data Analyst – Power BI Project

Blinket Data Analysis

- Created dashboards in Power BI to track sales and performance across different outlet types and locations.
- Analyzed key metrics like item identifiers, outlet age, visibility, weight, sales, and customer ratings.
- Identified sales trends to improve inventory management and sales strategies.
- Produced clear reports to share insights with the team for better decision-making.
- Worked with marketing and operations to ensure data analysis supported business goals.

School Buddy Case Study Analysis

Performance Analysis of Schools

- Data Analysis: Utilize Excel to identify trends and performance metrics.
- Dashboard Development: Create interactive visualizations in Power BI.
- SQL Queries: Write queries for efficient data retrieval from databases.
- Insights Delivery: Provide actionable insights for informed decision-making.
- Automation: Use Python for automating data analysis processes.
