Summary

Completed a master's program in Data Scientist, receiving certification.

A motivated Data Science and Data Analyst fresher looking to leverage my strong programming skills in Python, analytical aptitude and knowledge of data visualization to effectively analyse, interpret, and present insights from large datasets in an accurate and meaningful way.

I am passionate about working with data and using it to solve complex problem. I have always enjoyed diving deep into numbers, identifying patterns, and deriving insights that can drive strategic decision.

Seeking to collaborate with a leading data science and data analyst team to develop innovative models to detect patterns and trends for complex data-driven solutions.

Experience

Python for Data Science Intern
HUBBLEMIND LABS PRIVATE LIMITED
(Passed)

Sep 2024 – Oct 2024

Education

Bachelor of Science

2017 – 2020

Mathematics and Statistics

Dr. Babasaheb Ambedkar Marathwada University Chatrapati Sambhaji Nagar

65.65%

Course

Master's Program in Data Scientist

2022 - 2023

Simplilearn

Projects

1) Comcast Telecom Consumer Complaints Project

Completed Comcast Telecom Consumer Complaints Project using Python, including problem understanding, dataset importation, data cleaning, handling missing values, data visualization, mathematics and statistical analysis, modelling, evaluation, prediction, and completed of all given tasks.

2) Mercedes-Benz Project

Successfully executed the Mercedes-Benz Project utilizing Machine Learning techniques, with tasks including dataset importation, null values treatment, model training and testing, for loop implementation, label encoding, dimensionality reduction, Machine learning algorithms, XGBoost implementation, and completed of all assigned tasks.

3) Comparative Study of Countries Project

Conducted a Comparative Study of Countries Project using Tableau, involving tasks such as importing a CSV file into Tableau, creating a geographic map and webpage integration, KPI table creation, indicator shape creation, and ultimately creating a comprehensive dashboard.

4) Energy Consumption Prediction in Smart Homes (Internship Project)

During my internship, I developed a predictive model for energy consumption in smart homes, leveraging machine learning techniques to analyze historical usage data. Identifying patterns and trends in energy usage. Utilizing algorithms such as regression analysis and time series forecasting, I successfully created a model that improved prediction accuracy by 20%. This project not only enhanced my data analysis and programming skills but also deepened my understanding of energy management in smart environments, contributing to more sustainable living solutions.

Certificates

- | | |
|---|------|
| <ul style="list-style-type: none">• Data Scientist (Simplilearn)• Python• Machine Learning• Tableau• SQL• Deep Learning with Keras and Tensor Flow | 2023 |
|---|------|

Skills

- Programming Language like Python
- Machine Learning
- SQL
- Mathematics and Statistics Analysis
- NLP
- Feature Engineering
- Data Analysis
- Microsoft Excel
- Data Wrangling and Exploration
- Exploratory Data Analysis
- Handle Big Data
- Web scrapping
- Machine Learning Algorithms
- In Tableau Create Maps, story and Dashboard
- Evaluation
- Prediction
