PROFESSIONAL SUMMARY

Cloud computing professional with 2+ years of experience in designing, deploying, and managing AWS and VMware infrastructures. Skilled in delivering scalable, high-performance, and secure solutions to boost business agility and operational efficiency.

TECHNICAL SKILLS

- **AWS Services** : EC2, S3, RDS, CloudFormation, VPC, IAM, Lambda, Route 53, CloudWatch, Elastic Load Balancer, Auto Scaling.
- **VMware** : vSphere, vCenter 6.7/7, ESXi Hosts, vRealize Suite (vRA 7.x/8.x, vROPS, vRO), VMware Log Insight.
- **Infrastructure Automation** : VMware Lifecycle Manager.
- **Networking & Security** : VLAN Configuration, Security Groups, IAM Policies, Load Balancers, Route 53.
- **Backup & Recovery** : Micro Focus Data Protector, AWS Backup.
- **Operating Systems** : Linux (Ubuntu, RHEL), Windows Server 2016/2019.
- **Database Management** : MySQL, PostgreSQL, DynamoDB, Redshift.
- **Monitoring & Performance Optimization** : AWS CloudWatch, VMware vROPS.

PROFESSIONAL EXPERIENCE

Corporate InfoTech Private Limited, *Cloud Administrator*

Sep 2022 – present

(Client :- National Informatics Centre)

- Performed snapshots, cloning, and migration tasks across ESXi hosts, including both cold and hot migrations using vMotion.
- Maintained and troubleshooted VMware products, including vCenter 6.7/7.0, ESXi Host 6.7/7.0, and the vRealize Suite 7.x/8.x (vROPS, vRA, vRO), as well as VMware Log Insight.
- Upgraded VMware infrastructure, including vCenter and ESXi Hosts, from versions 6.7 to 7.0.
- Built, configured, and maintained vRealize Automation (vRA) 7.6 and 8.10 infrastructures using VMware Lifecycle Manager.
- Upgraded vRA environments from version 7.6 to 8.10, following a structured and designed process.
- Created VLANs on network switches, configured them in vRA as part of a network profile, and assigned them to users' virtual machines via vRA blueprints during provisioning.
- Implemented automated and manual backup solutions using Micro Focus Data Protector, ensuring 100% data integrity and recovery readiness.
- Conducted vulnerability assessments across Linux and Windows environments, addressing 98% of identified risks and aligning systems with security standards.
- Built and managed S3 buckets, including policy creation and management to enforce data governance.

- Designed and deployed scalable AWS architectures, utilizing services such as EC2, S3, RDS, and CloudFormation.
- Secured cloud environments by implementing AWS IAM best practices and configuring Security Groups to restrict unauthorized access.
- Monitored and troubleshoot performance issues, ensuring the efficient operation of VMware and cloud infrastructure.
- Deployed Templates for various operating environment.

Prime Services Infratech Private Limited,

Jan 2021 – May 2022

Project Assistance

- Provided operational support for project managers by streamlining schedules, logistics, and vendor coordination, reducing delays by 15%.
- Enhanced project efficiency through the preparation of comprehensive stakeholder reports, improving communication transparency by 100%.
- Supervised the delivery of services from multiple vendors, achieving 10% improvement in adherence to project timelines.

EDUCATION

B.E. Electronics and Telecommunication

2019

Bharati Vidyapeeth College of Engineering, Navi Mumbai, Maharashtra

CERTIFICATES

AWS Certified Solutions Architect Associate

Issued by Amazon Web Services

Date of Certification :- Jun 03, 2022
