Exposure to web development,analytical, problem-solving and debugging skills.Understanding of coding standards and ability to work independently as well as with the team.
	Current Organization: Organization : UL Technology Solution Designation : Software Engineer
	Academic & Professional Details : ● B.Tech in Computer Science and Engineering University - APJ Abdul Kalam Technological University College - LBS College of Engineering Kasaragod 2019-2023 CGPA - 8.55 ● Kerala Board of higher secondary examination. School - HHSIB Swamiji's HSS Edneer Kasaragod 2017-2019 Pass Percentage - 92.58
	Academic Training : ● Web Development Infoux Technologies - Completed a Internship on Python Web Development Conducted by Infoux Technologies Infopark Phase 1 ,Kakkanad , Kochi ● DataScience Nexus Info - Completed an internship on DataScience from Nexus info Coimbatore
	Skills : ● ASP .Net Core MVC ● Web API ● Machine Learning Concepts ● Azure DevOps ● Basic of React ● Power BI ● Html ● Git ● Python ● SQL Server

Work Experience:

- | | | |
|-----|---------------------|--|
| 1). | Organization | UL Technology Solutions Calicut |
| | Designation | Software Engineer |
| | Duration | February 2024 - Present |

RESPONSIBILITIES HANDLED:

Managing & Technical Level:

- Understanding of object-oriented programming using C#.
- WEB APIs for web apps using C#, .net core, entity framework 8.0
- Trained on MVC Application and Web API
- Knowledge on Azure DevOps Pipelines
- Created and supported in technical and business documentation.
- Understanding of HTML/HTML5, CSS and React
- Migrated the projects from .Net 4.6 to .Net 8 as part of Everest Modernization Project .
- Experience in working with Orchestration platforms for Containerization.

PROJECTS

Software Developer - ULCCS ERP System

ULCCS ERP Implementation & Support

- Developed and maintained a large-scale ERP application for ULCCS using .NET Core and Entity Framework Core, improving project management and financial tracking.
- Designed and implemented RESTful APIs for seamless communication between the backend and front-end interfaces, ensuring real-time data updates across systems.
- Optimized performance by leveraging asynchronous operations, caching mechanisms, and implemented microservices architecture for modular application structure.
- Integrated Azure Cloud deployment using App Services and Docker to ensure scalability and reliable cloud-based performance for the ERP system.
- Built secure user authentication features using ASP.NET Core Identity, ensuring compliance with security best practices, including JWT authentication and role-based access control.

Software Developer - Everest Migration Process

- Migration of applications from older frameworks to new .net 8 version.
- Experience in .Net upgrade planner and .Net upgrade assistant.
- Identified and resolved migration-related issues, enhancing application resilience and reducing downtime during the migration process through proactive troubleshooting and root-cause analysis .
- Integrated a comprehensive logging framework, providing detailed insights and traceability for debugging, monitoring, and error resolution, significantly improving issue detection and analysis.
- Developed and implemented health check controllers to continuously monitor system components, ensuring high availability and early detection of potential issues.
- Standard Documentation of Each Process
