

BIJU MUTHUSWAMY

SOC ANALYST - CYBERSECURITY

📍 Maharashtra • 📞 +91 8830611262 • ✉️ mailtobijum@gmail.com

SUMMARY

Leveraging 13+ years of networking and security experience to proactively monitor, analyze, and respond to security incidents within organizational network environments. Focused on enhancing threat detection capabilities, minimizing risk exposure, and ensuring compliance with industry standards and regulations.

EXPERIENCE

IT Security Analyst

Nov 2022 - Present

VARIANT MEDICAL

IT Security Analyst

Nov 2012 – Oct 2022

AVAYA INDIA PVT LIMITED

Key Deliverables:

- Monitoring experience in MacAfee SIEM tools, Elastic Kibana, Login failure, Top 10 traffic dashboards. Good experience in SOC process and procedure - Monitor the security report on noted irregularities. If the traffic coming from malicious IP, then performing traffic analysis based on other findings, then work with team to block malicious IP on firewall.
- Coordinate with SOC manager to escalate security issues to other business units including solutions development, customer hosting and corporate IT.
- Experience in log analysis on suspicious cases and prepare throughout report on it.
- Malware process, documentation, remediation and recommendation. Handling cases of infected machine's (Malware/Trojan/Worm)
- Working on alerts from SOC/SIEM and EPO – Incident Response
- Information Security - Coordination and chasing with the technical teams for timely updates (Resolution plan, change implementation, closure, applicability, risk of not implementing etc) for timely closure.
- Good experience of SharePoint ticketing systems and SecureWorks, Service Desk ticking tool.
- Good experience in SOC reports generation as per client requirements,
- Working as Computer Emergency response team, responding emails timely to solve related Queries and provide email response
- Working on PCI Environment, checksum changed alerts, disc full, Registry changes, User authentication failure, file delete activity and other hash value changes
- Experience in scan Log file analysis from Defender, Cylance, MacAfee and Symantec End point
- Office 365 cloud apps dashboard monitoring and responding alerts such as impossible travel activity, unfamiliar risky sign in , multiple failed login attempts , malware detection in one drive , password spray attempt , suspicious email detection activity , Mass download / Delete activity in One drive
- Good understanding of handling Phishing email and perform analysis using proof point TAP server
- Monitoring Active Directory Event failure notification and coordinating with server team to resolve
- Performing internal Qualys scan on network and identifying / reporting vulnerability on computers, servers and critical environment – recommendation to patch all severity vulnerabilities and providing rescan results
- Working on Log 4J, Ransomware and other critical severity malware cases within SLA
- Working on Scalar Proxy Blocked alerts on port 80 and browser related malware remediation process
- Performing SCCM inventories and confirming with Users for business needs of third-party applications
- Configuring FSRM to Prevent Ransomware attacks
- Monitoring DNS suspicious Queries and performing initial triage and escalating if Risk
- Analysing / identifying False positive alarms and provide analysis reports to next team to whitelist or allow that is needed for business reason
- Working on IDS / IPS / Firewall alerts from external IP that correlated on monitoring system, then performing analysis, IP abuse records, allow and deny traffic, threat information and remediation step as based on risk / bad reputation
- Working on TCP IP flood traffic on network, analysing risk or reputation then remediating targeted IP host or escalating to firewall team to block source IPs
- Working on Vendor Risk Management - Preparing questionnaires and responses, Risk score and Evaluation, Preparing Risk evaluation Document
- Working on Manage Engine End Point Central - patching vulnerable computers, servers, Apps Control, prohibited application control and other critical Vulnerability solutions ✕ Working with Proofpoint system TRAP, TAP, Domain Discover, Proofpoint Protection server
- Conducting security awareness training and phishing Campaign

IT Operation Associate

2008 – Dec 2011

IBM Daksh International

- Installation & configuration of network Printers. Administration of Windows Operating System and Helpdesk Management.
- Troubleshooting mail clients MS Outlook and Lotus Notes.
- Expertise in Windows Office Suite and various Desktop and Server applications.

SCHOLASTIC CREDENTIALS

- **CHFI Course** | 2018
InfoTech
- **Certified Ethical Hacker** | 2017
course
InfoTech
- **One Year computer network** | 2007
course, Polytechnic
Kerala University
- **BSc Computer Science** | 2005
Kerala University
- **HSC completed** | 2002
Kerala University
- **SSLC completed** | 2000
Kerala University

SKILLS

Key Skills

- Incident Response
- Microsoft Defender (Antivirus/Anti-Malware Solution)
- Endpoint Support
- Email Security (e.g., phishing protection, spam filtering)
- Patch Management (ensuring systems are up to date with security patches)
- Vulnerability Assessment
- Vendor Risk Assessment
- Security Awareness Training (educating users about security best practices)
- Intrusion Detection System (IDS) and Intrusion Prevention System (IPS)
- Log Analysis
- Security Information and Event Management (SIEM)
- Qualys Scanning (Vulnerability Management)
- Microsoft Intune (Mobile Device Management)
- Microsoft Azure (Cloud Platform)
- Microsoft Office 365 Cloud (Cloud Productivity Suite)
- Security Operations Center (SOC) Procedures
- Security Policy Documentation
- File Integrity Monitoring (FIM) Alerts
- File Server Resource Manager (FSRM) Alerts Setup
- ManageEngine Endpoint Support (Endpoint Management Solution)

IT Security Skills

- Proactive L2 monitoring, investigation, and mitigation of security incidents on Elastic ELK.
- Analysis of security event data to eliminate False Positives and identify true Positives (IDS, SIEM).
- Recognition of potential intrusion attempts and compromises.
- Log analysis using Elastic ELK to identify suspicious/malicious activities.
- Investigation of malicious phishing emails, domains, and IPs using Open-Source tools.
- Research on new threats and vulnerabilities, producing intel analysis of threat actors, IOCs, and vulnerabilities.
- Utilization of analytical skills to process information into intelligence.
- Direct management and escalation of outstanding remediation items.
- Attendance in classified briefings for information sharing and increased awareness of cyber threats.

SKILLS

Networking Skills

- Understanding of TCP/IP model and OSI Layers.
- Proficiency in Firewalls, Routers, Switches, and IP Addressing scheme.
- Knowledge in Telnet, FTP, SMTP, and DNS.

LINGUISTIC PROFICIENCY

English	██████████	Hindi	██████████	Malayalam	██████████
Marathi	██████████	Tamil	██████████		

PERSONAL INFORMATION

- Date of Birth: 22nd May 1985
- Gender: Male
- Marital Status: Married
