PERSONAL QUALITIES

- Problem solving skills.
- Good communication skills.
- Attention to detail oriented.
- Flexible with team.

Course project:

Cross E-learning orientation approach based on learners control broadcast.

- Domain : Big data , Platform : Dot net
- The source of getting information through the application while sharing the data or information is inadequate in hybrid filtering hence we propose collaborative filtering with memory based technique.
- A community based E learning application by using **K Neighborhood algorithm** which determines similarity between users.
- **Memory-based** filtering techniques use the entire user-item dataset to make different neighborhoods of users. **Influence propagation** is used that a learner can move toward active learners, and such behaviors can stimulate others.

Internships:

- Wise Tech Source Pvt. Ltd (40 hrs) : Learned new programming language (C#) and did mini project with an one day workshop on Artificial Intelligence (rpm) .
