Skills

- **Languages** : Solidity | JavaScript | TypeScript | Rust
- **Frameworks and Libraries** : Reactjs | Redux | Etherjs | Web3js
- **Tools** : Git | Docker | Hardhat
- **Platform** : Ethereum | Polygon | Solana | Binance

Experience

Software Engineer

Antier Solutions

Mohali 6/2023 - PRESENT

- Orchestrated the seamless integration of both frontend and backend components for a project centered on **limit orders**, **stop orders** and **order book** functionalities within a **decentralized exchange**, leveraging the power of **Uniswap** contracts.
- Superheaded the integration of a user-friendly **chat based UI** frontend, implementing cutting-edge **account abstraction** concepts. This involved navigating through intricate algorithms, managing **socket** integration , **redux** state management , **Web3Auth** integration and **graph data structure** with finesse.
- Led the frontend integration efforts for an asset **Tokenization** platform , seamlessly incorporating robust features such as **2FA authentication**, **KYC compliance**, real time **asset tracking**, **customizable token** parameters.

Assistant Software Engineer

Antier Solutions

Mohali 06/2022 - 06/2023

- Engineered a sophisticated smart contract for 2 different **NFT marketplace**, seamlessly incorporating industry-leading standards such as **ERC721**, **ERC1155**, and **ERC2981** for royalty management, ensuring secure and efficient transactions
- I architected the frontend interface for a cutting-edge decentralized exchange, driven by Uniswap contracts, enriched with seamless functionalities for **farming**, **harvesting** and **staking**, offering users an immersive **De-Fi** experience.
- Engineered the backend infrastructure for an in-house project, harnessing the capabilities of **Biconomy SDK** to enable gasless transactions and parallel processing, ensuring a seamless and efficient user experience.

Software Engineer, Intern

Antier Solutions

Mohali 12/2021 - 06/2022

- **Decentralized Exchange**: DEX smart contract development with staking and farming functionality (Solidity)
- Smart contract development, deployment and testing using **Hardhat**, **RemixIDE**

Projects

- **BOOKMART** :-
 - Ecommerce website for books including **jwt authentication**, **crud features**
 - Implemented a **payment gateway** for purchasing books using **brainTree** dummy debit and credit cards.
 - Implemented an email service using **nodemailer** for different purposes like signup mail, reset password, order status.
 - Implemented a dummy **tracking service** for order tracking.
- **CRM System** (Customer Relationship Management) :-
 - Attendance portal system in which a company can register and employees can clock time.
 - UI for both company admin and employee screen.
 - Hierarchy chart for company employees.
 - Implemented gRPC in node js for better performance.

Education

MCA

Chandigarh University

Chandigarh 06/2022 - 06/2024

BCA

Chitkara University

Rajpura 06/2019 - 06/2022
