- 3.4 Years of experience in Manual Testing, Automation Testing (Selenium Web Driver with java), Functional Testing, Regression Testing, Retesting, Sanity Testing, Smoke Testing.
- Good Experience in Healthcare Domain Testing.
- Experience in Selenium Web Driver and Core JAVA.

SKILLS:

Automation Testing | User Acceptance Testing | JAVA | OOPS | Selenium | Testing | Maven | POM | Postman | Soap UI | SQL | Git | Agile | Scrum | SDLC | STLC | Cucumber | Defect Tracking | Bug Reporting | Test Planning | Test Design | Test Execution | Functional Testing | Integration Testing | Regression Testing | Smoke Testing | Accessibility Testing | Mobile Testing | JMeter | GIT | BDD | Cucumber | Jenkins | Power BI |

PROFILE SUMMARY:

- A detail-oriented professional with 3.4 years of experience in Software testing, Automation testing with expertise in E-commerce domain.
- Proficient in Test Automation using Selenium Tool.
- Used SOAP UI and running SQL queries to create test data from back-end.
- Mobile testing by using browser stack.
- Familiar with CI CD pipelines.
- Perform ETL batch job validation and identification of defect and reported using test management tool (Jira).
- Experience in developing the scripts using Testing annotations.
- Experience in working on Page Object Model Design pattern with Behavioral Driven Development framework (BDD).
- Developed and maintained automation scripts using Selenium with Java with Page Object Model (POM) design pattern, utilizing Maven and Git for UI automation of critical features resulting in reduced efforts for manual testing and helped in reporting defects for regression testing.
- Performing Git-Sync activity post-release for seamless code integration.
- Streamlined software testing activities by defining test strategies and creating test artifacts like test plans, test cases, test scenarios, test reports.
- Executed, analyzed, and documented automated regression suite outcomes post-integration testing, delivering comprehensive feedback to project stakeholders.
- Responsible for Test case Writing, Execution, Bug Tracking and Reporting
- Performed different types of testing like Functional testing, Regression Testing, Retesting, Sanity Testing, Smoke Testing.
- Complete idea about SDLC and Familiar with Software testing life cycle, Scrum, Agile process.
- Very good experience in analyzing requirements (SRS).
- Working closely with cross-functional teams as developers, business analyst and support teams to troubleshoot issues and ensure timely resolution of defects, Implemented Agile Methodology process in the project.
- Prepared test Scenarios, Design Test cases, and Defect analysis, defect report.
- Execution of Test Cases with the help of automation tool Selenium.
- Good knowledge of object-oriented programming (OOPs) concept.
- Participate in scrum meeting to discuss about project progress report every day.
- Worked on Project Management Process, bug tracking process using Jira.
- Prepared mapping sheet of SRS and test cases
- Excellent understanding of Defect Life Cycle.
- Good communication, collaboration with proficiency at grasping new technical concepts quickly and utilize the same in a productive manner.

CORE COMPETENCIES

- Operating Systems : Windows
- Languages : Core Java
- Database : MYSQL
- API : Selenium
- Defect Tracking Tools : JIRA
- Software Testing Skills : Functional testing, Automation testing, Selenium Web Driver, Cucumber, Testing, BDD, GIT, J Meter

PROFESSIONAL WORK EXPERIENCE

➤ ORGANIZATION – Web Hub Technologies

➤ Client - HCL technology

➤ 1. Project - Argos (E-commerce domain)

Duration – Aug 2022 - Present.

Argos is one of the UK's biggest merchandise retailers, operating physical stores with a substantial online presence. Argos developed its own brands, including Challenge, Cook works, Pro Action, Pro-fitness, Steam works, Acoustic solutions, etc. Moreover, it has generated a revenue of £4.1 billion in the year 2020 and has aggregated more than 29,768 employees in the UK. With a traffic of 38.44M monthly visitors, this e-commerce company has 60,000 products on offer.

➤ 2. Project - Experian (Net banking domain)

Duration – July 2021 - Aug 2022.

Experian Loan origination is a fully-featured Loan Origination software designed to serve SMEs, Enterprises, and Agencies. Experian Loan origination provides end-to-end solutions. This Loan Origination System offers Compliance Management, Document Management, Loan Processing, and Online Application at one place.

Roles and Responsibilities

- Understand the FRS document and analyses the requirement.
- Designing and executing test cases from the Functional specifications.
- Execute the test case to validate customer requirement.
- Worked under agile methodology.
- Participated in the Test case review meetings.
- Performed Functionality Testing, Retesting and Regression Testing.
- Interact with developers and discussed technical problems, Bugs Tracking and Generating Reports.
- Reporting the Regular status to the higher authorities in a timely manner.
- Prepared mapping sheet of SRS and test case.
- Participate in scrum meeting to discuss about project progress report every day.
- Providing KT session to new resources in technical perspectives.

EDUCATIONS

- Masters Of Science (CGPA: 7.1/10) in May 2020 Mahatma Phule Krushi Vidyapeeth, Rahuri, (MH)

PERSONAL DETAILS

- Name : Akash Ravindra Patil
- Date of Birth : 11 July, 1994
- Contact : 7972652983
