EDUCATION

2021- 2023: MBA (Financial Management)
NMIMS (Narsee Monjee) Mumbai

2004 - 2008: B.Tech. (Computer Science)
Bundelkhand University, Jhansi

CORE COMPETENCIES

- Team Management & Leadership
- Project Management & Service Delivery Excellence
- Continuous Process Improvement/Transformation & Automation
- Data Analytics & Insights Generation
- Quantitative Analysis, Methodology & Model Validation Framework
- Regulatory & Compliance
- Fund and equity quantitative rating
- Financial Model Stress Testing
- Batch Analytics and Scenario Analysis
- Data Governance & Data Visualization
- Time Series Analysis
- Statistical Analysis, AI/ML & Predictive Modeling

TECHNICAL SKILLS

- Languages & Database:** Python, C#, SQL, AWS Athena, Shell Scripting
- Data Analytics:** ML, Stats, Regression, Quantitative Financial data Analysis
- Tools & Framework:** Jupyter Notebook, Jira, Visual Studio, AWS Cloud, SourceTree, SonarQube, MTM, PyCharm, Anaconda, TFS, Wiki, Asana, excel, PowerBi, Tableau, Servicenow, workday
- CI/CD:** Jenkins, VSTS, Stash, AWS, Git
- Domain:** Finance, NBFC, Vibration Monitoring, Oil & Gas, Healthcare.
- Validation Framework:** Methodology validation, Data Integrity, Acceptance, System, Integration, Regressive, UAT, Box, Data Testing, BDD, PyTest, Selenium, TestNg, Playwrite, Rest Assured, ETL, API, LoadRunner, MSTest, CodedUI, Great Expectation, Cucumber

CERTIFICATIONS

- Certified ScrumMaster® (CSM)** from ScrumAlliance- 28th October 2024 ([Badge](#))
- University of **Pennsylvania** online program in Finance & Quantitative Modeling, 2022 ([Badge](#))
- ISTQB** Fundamental Level Certified Tester, 2018 ([Badge](#))
- Oracle** Award of Achievement in Structured Query Language (**SQL**) and PLSQL, 2007
- Indian Institute of Technology Roorkee (**IIT-r**) campus program under STEP on Object Oriented Programing, Project and Certification, 2006
- SCJP** (Sun Certified Java Programmer) 1.4, 2006

CAREER TIMELINE

PROFILE SUMMARY

- Results-driven Delivery Manager, Project Manager, Quality Analyst, Scrum Master with 15 years of industry experience in **data, software, and firmware**, focusing on exceptional client satisfaction.
- Strong leadership skills demonstrated by managing a multicultural team of quantitative analysts, enhancing model validation, ETL Data Testing and improving production timelines.
- Proven expertise in **Agile framework, including Scrum and SAFe**, coupled with a deep understanding of automation testing frameworks and processes.
- Extensive experience in financial data modeling spanning diverse asset classes, **analysis and validation**, with proficiency in quantitative ratings, ESG scores and risk models.
- Recognized for optimizing model and data validation processes, achieving a **40% reduction in operational expenses** through enhanced accuracy and error reduction in model runs.
- Skilled in **data-intensive analytics and cloud-based tools**, achieving **30% man-hour savings** by leveraging AWS and Jupyter Notebooks for validation.
- Accomplished in **client engagement**, playing a pivotal role in business requirement analysis, client-level reporting, and expanding the reach of quantitative product offerings.
- Track record of success in conducting stress tests and managing risk models under adverse scenarios, enhancing **organizational resilience and risk management**.
- Created and executed **data governance** measures to enhance the efficiency of the model production process, ensuring increased reliability, advanced data analytics, and compliance.
- Recipient of **multiple performance awards**, including Morningstar's "Star of the Quarter" for notable achievements in model release quality and client satisfaction.
- Experienced in **end-to-end project management**, from quality, scope, schedule, budget, communications, risk, procurement, cost, resources, stakeholder, and integration management.
- Adept in optimizing test cycles and processes including FMEA, Coding Guidelines, RCA, Dependency, traceability Matrix and SLA, significantly **improving efficiency and reducing execution time by 50%** through automation.
- Financial services and investment products, **Risk and Control SME** on operational and compliance Testing and Risk.
- Strong technical acumen with hands-on skills in Python, SQL, AWS, and various analytical tools like Power BI and Tableau, supporting **data-driven insights and decision-making**.
- Knowledge of **firmware** data testing tools: Auto IT, Wireshark, FTP (PuTTY, Tera Term), Modscan, UI Spy, Debug Daig, VMWare vSphere, MS Hyper-V, Perfmon.

WORK EXPERIENCE

Aug 2018 to Present: Morningstar India Ltd., Mumbai

Duration: 6 Years

QA Test Manager

Projects:

Projects: Risk Model, MPRS, Morningstar Quantitative Rating, Medalist, Quantitative Equity Rating, Investor Pulse, Internal Clients- APG, Morningstar Direct, Indexes, Advisor workstation, MIM; **External Clients-** TD Bank, Merrill Lynch, **Language, tools and frameworks:** Python, SQL, PyTest, Jupyter Notebook, Selenium, BDD, API's, AWS, Great Expectation

Significant Highlights:

- **Client Engagement and Product Reach:** Acted as a key liaison between clients, product teams, research, and technology, handling scrum of multi team, client conversations related to CLR (client-level reporting), business requirements, and technical specifications. Instrumental in expanding the reach of Morningstar Quant offerings.
- **Leadership in Quantitative Analysis Team:** Led and supervised a team of twelve quantitative analysts involved in various financial research model production and validation processes, fostering a collaborative and high-performing work environment.
- **Management of Data-Intensive Analytics Tools:** Managed data-intensive analytics & Automation tools built on Big Data/Cloud Ecosystem (AWS), Python, SQL, Selenium, BDD, API's, PyTest leading to significant man-hour savings in the validation process.
- **Enhanced Accuracy in Risk Models:** Successfully managed end-to-end production of risk models and financial research models, achieving a remarkable 90% improvement in model validation accuracy within a strict timeframe.
- **Optimized Data Validation Processes:** Spearheaded improvements in model input and intermediate output data validation processes, resulting in a 40% reduction in AWS expenses by identifying and rectifying incorrect model runs.
- **Streamlining the validation process:** Streamlined the validation process using Jupyter Notebook, Python, SQL, Selenium, BDD, API's, PyTest, AWS, Great Expectation which reduced the turnaround time taken to validate the existing and monthly production models.
- **Diverse Expertise in Quantitative Analysis:** Expert in scrum handling, model validation, Quantitative portfolio analysis, Equity data, Fund data, Fixed Income data, ESG scores, Climate datasets, index universe, Factor Profile, ETL, Returns, Regression calculation, Exposures & Premia data analysis
- **ETL Testing and ETL tools:** Data Standardization, Data winsorization, Data imputation, Log transformation including Structure check, Mapping, Constraints, Consistency, Completeness, Correctness & Accuracy, Transform, Quality, Null, Duplicate, Date check, Data Cleaning validation.

Accomplishments:

- **Recognized for Product Expertise and Risk Model Management:** Received accolades from clients for demonstrated expertise at the product level and adeptly managing risk models, leading to heightened client satisfaction.
- **Star Performer - Q3 2021:** Earned the Star of the Quarter Award for Q3 2021 at MorningStar Inc., acknowledging outstanding contributions and exemplary performance during that period.
- **Star Performer - Q4 2020:** Secured the Star of the Quarter Award for Q4 2020 at MorningStar Inc., underscoring consistent excellence and notable achievements in the assigned role.
- **Spot Award for Model Release Excellence - 2019:** Received a prestigious spot award at MorningStar Inc. for the exceptional release of a risk model, recognized for maintaining the highest quality standards in 2019.
- **Active Participation in Client Conferences:** Engaged in client conversations during various conferences, including MICIn and SFS-Singapore, playing a pivotal role in expanding the outreach of Morningstar Quant offerings and enhancing the company's industry presence.

Oct 2011 to Aug 2018: Capgemini / Accel Frontline (Client - General Electric), Mumbai

Duration: 7 Years

Senior Consultant

Projects: System1 Evolution, Bently Nevada Monitor Configuration, Adapt 3701

Significant Highlights:

- **Defined Automation Test Strategy:** Formulated a robust automation test strategy by meticulously conducting Failure Modes and Effects Analysis (FMEA). This involved creating comprehensive dependency and traceability matrices to ensure the thorough testing of critical functionalities.
- **Leadership in Test Cycle Execution:** Assumed a leadership role in overseeing the seamless execution of test cycles within Agile methodologies. Provided overall guidance and direction to the team to ensure the successful implementation of testing processes.
- **End-to-End Test Cycle Management:** Took charge of the entire testing lifecycle, from crafting and refactoring tests using C#, Java, Selenium, LoadRunner, Shell Scripting, SQL, AutoIT, Firmware tools to generating test specifications. This encompassed the setup of test environments, meticulous preparation and acquisition of test data, and the subsequent implementation, execution, and evaluation of test results.

Accomplishments:

- **Gear Award Recipient for QA Excellence - 2013:** Received the prestigious Gear Award at GE Oil & Gas for the remarkable identification of a substantial number of critical GUI and functional defects in the flagship software during the integration phase, showcasing a commitment to quality assurance.
- **Pat on Back Award for Test Optimization - Capgemini:** Earned the Pat on Back Award at Capgemini for outstanding contributions to test optimization, successfully reducing cycle time by an impressive 50%. Demonstrated excellence in enhancing automated testing processes for increased efficiency.

Feb 2010 to Oct 2011: Kavin Corporation, Bangalore

Software Engineer (C# .Net)

Clients: NACO, Government of India, KHPT, USAID, Bill & Melinda Gates Foundation

Projects - APAC-CIMS, Ashodaya Samiti (AMIS), Mahithimane

- Developed windows-based .NET application with financial assistance from the USAID, under an agreement with the Government of India & NACO and under Bill and Melinda Gates Foundation's Avahan Initiative.

Apr 2009 to Feb 2010: Avigma Technologies, Gurgaon

Software Engineer (C# .Net)

Projects – Metalairlouver

Clients – Louverpro

PERSONAL DETAILS

Date of Birth: 12th June 1985

Notice Period: Immediate Joiner

Languages Known: English, Hindi
