OBJECTIVE

Become a successful professional in the field of software development and also to be associated with an organization that gives me opportunity to learn as well as contribute for the growth of the organization.

PROFESSIONAL SUMMARY

- Having **3.2 years of experience** in **Mainframes** in the IT industry, worked on Development and Maintenance.I have been involved in the complete Life Cycle of the SDLC.
- Qualitative experience in development and maintenance support on IBM Mainframes.
- Hands on Experience on Mainframe related skills such as **JCL, COBOL, VSAM, DB2.**
- Hands on Experience in handling the Tool such as **TSO-ISPF, FILE-AID, ENDEVOR, XPEDITOR.**
- Having knowledge of **CICS and IMSDB.**
- Good work ethics with excellent Analytical, Programming, Communication and Interpersonal skills that provide me with the ability to interact with end-users, managers and team members.

ACADEMIC QUALIFICATION

- Graduated in B.tech from **JNTUK** university.

TECHNICAL PROFICIENCY

- | | |
|-------------------------|--|
| • Areas of Interest | : Mainframe |
| • Tools | : TSO-ISPF, FILE-AID, ENDEVOR, XPEDITOR, SPUFI |
| • Operating Systems | : ZOS |
| • Programming Languages | : JCL, COBOL |
| • File System | : VSAM |
| • DBMS | : DB2 |

EXPERIENCE SUMMARY

- Worked with **HCL** as Software Engineer from September 2022 to till-date.
- Worked with **Wipro** as Associate Software Engineer from March 2021 to September 2022.

PROJECT 2:

Title	CVS Health Corporation
Client	CVS Health Corporation, US
Role	Software Engineer
Organization	HCL
Duration	Sept-2022 to till date
Team	8
Skills	JCL, COBOL, VSAM, DB2
TOOLS	Endeavor, FILE-AID, SPUFI

Project Description:

This Project involved in modifying legacy applications and modernize with new technology Breakout the legacy components and checking the member eligibility and provider products and vendor codes. Increase revenue by streamlining business processes and standardizing services across states which provide additional product offering and promote cross selling opportunities. CMS will process the claims and adjudicate or apply benefits to the Claim and update in the history database. Finally sending the EOB to downstream promote visibility into customer and market needs by supporting common data definition, eliminating data mapping and promoting enterprise analytics. This system provides the functional capability to automatically adjudicate, record, maintain and report processed claims. The claim system provides the following main functions. Transaction Validation – Validates the input entered by the user against Tables, date validations and database validations.

Roles & Responsibilities:

- Involved in all phases of the project including Requirement Analysis, Design, Coding and Unit Testing.
- Involved in effort estimation, Impact Analysis and Design.
- Creating Low-Level Design Document and Unit Test Plan.
- Interacting with the onsite team for discussing project related activities and issues.
- Unit testing of the code and capturing the details in the UTR.
- Coding using COBOL and DB2 for the enhancement tasks.
- Understand and modify JCLs as needed.
- Understanding and modifying DB2 queries and ability to write complex queries to extract data.
- Involved in creation and review of design documents.
- Onsite Project Communication to get the business requirements from the client.

PROJECT 1:

Project Title	Changing account number from six to 8 digit
Technologies	JCL, COBOL, DB2, CICS
CLIENT	BNYM
Organization	WIPRO
Domain	BANKING
Duration	March 2021 to September 2022
Tools	ENDEVOUR, FILE-AID, XPEDITER
Role	Team member

Project Overview:

The Bank of New York Mellon Corporation (BNY Mellon) is American investment banking services providing custodian and security services.

As part of DVS offshore team my key role and responsibilities include

Roles & Responsibilities:

- Coded & modified COBOL programs specific to their corresponding accounts, schemes & policies under them, loans applied respectively under common card team.
- Modified existing jobs so that new procedures coded could run.
- Tested procs for syntactical, compilation errors. Made job specific UTP's & UTR's.
- Coded a batch reports by using COBOL-DB2 jcl files.
- Performed impact analysis for copybook change and listed the impacted components.
- Monitoring the jobs as per schedule.
- Responsible for on call support.
- Interacting with the clients in the meeting and describe the status of the task.
