IBM DB2 LUW DBA

Professional Experience

Overall 4+ years of relevant experience as an IBM DB2 LUW DBA with extensive production support in a highly process driven environment.

Career Objective

Intend to build a career with leading corporate of hi-tech environment with committed and dedicated people who will help me to explore myself fully and realize my potential, willing to work as a key player in challenging and creative environment.

Education Details

 B.Com Computers from Acharya Nagarjuna University, Guntur.

Technical Skills

Operating System	AIX/UNIX, Linux
Databases	DB2 UDB V10.5, 11.1 and 11.5
Other Technologies	SQL, knowledge on shell script
Tools Used	Service Now, ISM Tool

Employment Details

- Working as a DB2 LUW DBA for KPMG, Bangalore from May 2020 to till date.

Technical Experience

- Experience with DB2 LUW family 10.5 11.1 and 11.5 Installations, Configurations, Administration and Migration of the databases in AIX and Linux environments.
- Working as a L2 level Support.
- Expertise in setting up HADR ACTIVITIES
- Expertise in using DB2 Movement Utilities like Export, Import and Load.
- Taking database Backups and recovering the database with Backup images.
- Experience on Restore the Backup images using Redirect Restore method from source server to destination server.
- Expertise in applying PATCHES (Fix Packs) on db2 servers.

- Scheduling database backups in Backup scripts using Cron Jobs.
- Expertise in creating Instances, DB2 databases, buffer pools, Tablespaces as per client requirement.
- Expertise in generating data definition language using DB2LOOK command from existing database and creating the same objects in newly created databases.
- Expertise in running REORG and RUNSTATS for better performance of the database.
- Configuration, Setup of DB2 |high availability disaster recovery (HADR) databases.
- Experience on maintaining Database Level (DB CFG) and Database Manager Level (Instance) Parameters.
- Expert at using DB2 diagnostic tools available: db2pd, db2mtrk, db2support, db2diag log file and notification log files.
- Providing assistance to the application team on resolving locking solutions.
- Involved in design and maintenance of databases, performance testing and troubleshooting.
- Monitoring and Alerting databases using IBM Data Server Manager.
- Preparing of Database documents like Standard operational Procedures (SOP's) for production servers.
- Attending daily calls with Offshore and Onsite teams.
- 24X7 production support.

Project Details

Project-2:

Client: VISA

Role: Senior Data Engineer

Environment: DB2 11.1 and 11.5

Responsibilities:

- Installed Nutanix servers and Creation of DB2 setups in Development, Test, Preprod and Prod environments.
- Upgrade DB2 UDB databases and applying fix packs to keep DB2 at most recent level.
- Tuning database configuration parameters and DB2 registry variables for better memory utilization using AIX shared memory model.
- Performance Tuning at application Level, Database and OS level.
- Tuning SQL's to get optimum performance using formatted explain utility and index advisors.
- Actively involved in HADR server build and setups.
- Involved in database design, configuration, backup and recovery, performance tuning.
- Replication configuration, Monitoring, Troubleshooting & Maintenance.
- Working on the Incident tickets for any Database Errors.
- Skillfully performed activities related to Installation, Migration, HADR set up and performance tuning.
- Helping the application team on deployment activities.
- Performing DB Refresh activities from production to non-production databases.
- Providing solution on change management and problem management.

- Involves in audits conducted by NASCO and IBM quality control teams on CSRs (Change System requests) to ensure all the deliverables are adhering to the HIPAA standards.
- Involves in Pre-prod and production deployments.
- Coordinate with client application teams, stakeholders, cross commit teams for requirements, integrated software analysis, development, testing and implementation in staging and production environments.
- Responsible for database recovery and High Availability Disaster Recovery activities.

Project-1:

Client: TG Power Systems

Role: Data Engineer

Environment: DB2 10.5

Responsibilities:

- Installed various versions of DB2 UDB fix packs on AIX Environments.
 - DB2 Instance creation and Configuration of dbm parameters.
 - Database creation and configuration of db parameters.
 - Table space management – Adding, dropping, extending, reducing and resizing table space containers.
 - Data Movement Utilities (Load, Import, Export, db2move).
 - Monitoring and analyzing db2diag.log for errors and warnings.
 - Monitoring the size of the table spaces by setting up a threshold (80%).
 - Performing backup, restore, roll forward and redirect restore.
 - Performing Reorg and Run stats on Tables on demand.
 - STOP and START HADR on scheduled downtimes.
 - Using of Snapshot monitors, DB2top, DB2pd, DB2diag.log, Notification log and Administrative.
 - Recovering the Database to a consistent state through Restore, Roll-forward techniques and also performing Redirected restore in case of movement of tablespace containers.
 - Preparing of Database Documents like Standard Operational procedures (SOP's) for production servers.
 - Participating on weekly schedule activities like db2stop & db2start at the time of any patching activities.
 - Having experience on taking all types of backups.
 - Well experienced in monitoring and trouble shooting.
 - Having experience on restores likes normal restores & redirect restores.
 - Doing the databases health checks and preparing the reports and sharing to onsite team.
 - Experienced in performing DB Refresh activities.
 - Performed DR (Disaster Recovery) Exercise.
 - Performing the data movement utilities by using db2 export, import & load.
 - I had experience in granting permissions as per the tickets and requirements.
 - Handling all types of tickets and resolving within the SLA's.
 - Attending daily calls with offshore and onsite teams.
 - 24X7 production support.
-
