ACADEMICS

Qualification	Board / University	Passing Year	% / CGPA
M.Sc Data Science	Christ (Deemed to be University)	2025	74.63%
B.Sc (Comp Science, Mathematics, Statistics)	Christ (Deemed to be University)	2023	83.34%

EXPERIENCE

CypherSage Data Scientist & Founder (Freelancing) Apr 2024 – Present	• Delivered tailored data analytics and machine learning services to academic researchers, freelancers, startups, financial firms, and nonprofits, enhancing decision-making and operational efficiency. • Successfully managed multiple roles, including project management, client relations, and technical development, ensuring smooth operations and client satisfaction. • Completed over 20 projects with 10+ clients across multiple industries, consistently meeting and exceeding expectations through tailored solutions and innovative approaches.
Gaining.ai Data Scientist Intern Jan 2024 – Apr 2024	• Developed predictive models for Mutual Funds, achieving a 17% increase in forecasting accuracy with also improving the data pipeline. • Applied key asset management concepts to enhance model performance, incorporating advanced metrics for risk-return analysis. • Provided clients with comprehensive statistical analysis and data visualisations, resulting in a 28% improvement in investment decision-making efficiency.
Vitara Enterprises Data Analyst Intern Jun 2022 – Jul 2022	• Created and maintained interactive data dashboards using Tableau, enhancing data accessibility and visualisation for stakeholders. • Identified, designed, and implemented internal process improvements, automating key tasks using Python, resulting in almost a 30% reduced manual processing time.

MAJOR PROJECTS

DataEase • User-Friendly Data Analysis: DataEase allows users with no technical background to easily upload and analyze data through a guided, step-by-step workflow, covering data cleaning, visualization, and statistical analysis. • Automated Suggestions: The platform automatically detects and suggests corrections for common data issues such as missing values and incorrect data types, making the process smoother for non-experts. • Advanced Insights Made Simple: Users can generate visualizations, perform hypothesis testing, and identify trends without needing to code, thanks to DataEase's AI-powered interface.
Insightify • Developed a system to analyse millions of Amazon customer reviews, providing comprehensive product comparisons and sentiment scores using advanced NLP techniques. • Automated data extraction and preprocessing with Java, Jsoup, and Selenium, integrating a centralized MySQL database for efficient data management. • Implemented sentiment analysis with Stanford CoreNLP, generating composite product scores to enhance consumer decision-making and confidence.
InternPred • Created a web-based platform to provide comprehensive insights into internship opportunities from Internshala, focusing on stipend information, job roles, and company details. • Implemented data extraction using Selenium and BeautifulSoup to gather extensive internship data, ensuring accurate and up-to-date information. • Applied a Light Gradient Boosting Machine (LGBM) model to predict stipend amounts and offered personalized internship recommendations based on user inputs and skills, aiding informed decision-making through industry trend analysis.

POSITION OF RESPONSIBILITY AND MAJOR ACHIEVEMENTS

• Part of organizing team for national-level technical fest TechGenX, ensuring smooth operations and high engagement. • Contributed open source to few famous libraries. Part of team fixing nsepython library during downtime due to new updates. • Contributed to Omdena Japan Local Chapter: Monitoring Wellbeing of Elderly People and Providing Support with IoT (2022). • Contributed to Research Project (Patent awaited): A Strategic Approach for Restructuring of Financial Distressed Companies in India. • Certificate: Data Visualization and Communication with Tableau Data Science Professional Certificate
