WORK EXPERIENCE

ANALYST/ SOFTWARE ENGINEER (Full-Time) | CAPGEMINI — Pune, Maharashtra, India

June, 2024 — August, 2024

- Utilized the **.NET Framework** and **C#** to develop and enhance software features, contributing to the successful launch of **3 product releases** within 3 months.
- Employed **JIRA** for **project tracking and backlog management**, collaborating closely with cross-functional teams in **Agile** and **Scrum environments**, which resulted in a **25% improvement** in **product delivery timelines**.
- Conducted user feedback sessions to inform **product design decisions**, achieving a **15% increase in user satisfaction** through **enhanced functionality and overall product performance**.

CYBERSECURITY INTERN | CISCO NETWORK ACADEMY— Remote, India

June, 2022 — July, 2022

- Identified and mitigated **cybersecurity threats** within **software applications**, **reducing potential vulnerabilities by 30%** and enhancing product safety through effective security protocols.
- Performed over **15 vulnerability assessments and penetration tests** on software features, delivering **actionable insights** that enhanced **risk management strategies by 25%** and informed **secure product development**.
- Collaborated with **cross-functional teams** to **develop security policies and procedures**, ensuring **100% compliance with regulatory requirements** for all software features, resulting in **increased user satisfaction** and overall product safety.

BLUETOOTH TECHNICAL EXPERT INTERN | IEO MAKERS FABLAB (OPC) PVT. LTD. — Remote, India

April, 2020 — June, 2020

- Developed **AR-based smart glasses** with **integrated software features**, utilizing the **Arduino microcontroller** to enhance **user experience** through innovative **augmented reality** functionality.
- Integrated **Arduino UNO** with **Bluetooth modules** to ensure seamless connectivity and optimize data transfer, achieving a **40% reduction** in latency and enhancing real-time performance, which **increased user engagement by 25%**.
- Collaborated with **cross-functional teams** to collect user feedback and **implement software enhancements**, aligning product features with market demands and **boosting user satisfaction by 25%**.

PROJECTS

YOUTUBE TRANSCRIPT SUMMARIZER | Python, HTML, CSS, JavaScript

February, 2024 — May, 2024

- Developed and launched a **web-based tool** that condenses YouTube video transcripts using **software algorithms**, **increasing user engagement by 30%** and enhancing content accessibility.
- Designed a user-friendly interface with **HTML, CSS, and JavaScript** for improved video analysis, resulting in a **20% increase** in user retention and acquiring positive feedback from over **95%** of users on usability.
- Integrated advanced **text summarization** and **video processing techniques**, enabling quick, accurate summaries, and **collaborated with cross-functional teams** to align features with user needs, reducing time-to-market by **15%**.

SENTIMENT ANALYSIS OF IMDB MOVIE REVIEWS | Python, ML, NLP

May, 2022 — May, 2023

- Analyzed over 50,000 IMDB movie reviews** using **ML algorithms (Naive Bayes, SVM, Logistic Regression)** for content analysis, achieving an **accuracy of 89.9%** and enhancing **model effectiveness by 15%**.
- Leveraged insights from **sentiment analysis** to inform **product strategy**, enhancing user experience and engagement, which contributed to a **30% increase in customer satisfaction**.
- Collaborated with cross-functional teams to implement iterative improvements in software models based on user feedback, developing a **data-driven approach to product development**.

SPAM E-MAIL CLASSIFIER | Python, ML, NLP

March, 2021 — July, 2021

- Developed a **spam email classifier** using the **Naive Bayes algorithm** and integrated **image recognition for email attachments**, achieving a **92% accuracy rate** in **distinguishing between spam and ham emails**, enhancing email management efficiency.
- Utilized **advanced machine learning & NLP techniques** to **improve classification accuracy by 15%**, significantly reducing false positives and boosting user trust in email filtering.
- Processed and visualized data using pandas and Matplotlib**, generating actionable insights that informed **software and computer vision feature iterations**, enhancing the overall user experience through **data-driven decisions**.

SKILLS SUMMARY

TECHNICAL SKILLS

Programming Languages : C++, Python (pandas, NumPy, Matplotlib, Scikit-learn), C#, JAVA, SQL, HTML, CSS, JavaScript

Technologies & Tools: RESTful API, Git/GitHub, DBMS, MySQL, PostgreSQL, Snowflake Data Warehouse, AWS, GCP, Oracle, Machine Learning (ML), Natural Language Processing (NLP), CNN, JIRA, Computer Networks, Spring, Springboot

DEVELOPMENT METHODOLOGIES

Core Competencies: Agile, Scrum, SDLC, .NET Framework, CI/CD Pipeline, DevOps, Site Reliability Engineering (SRE), Docker, Kubernetes, Jenkins, Data Structures & Algorithms (DSA), OOPS

DATA & ANALYTICS

Core Competencies: Data Analysis, Data Science, Statistical Modeling, Predictive Modeling, Metrics Analysis, A/B Testing, Data Visualization, Google Analytics

Tools: Power BI, Tableau, Excel, Product Analysis, Product Management

PLATFORMS

Visual Studio Code, Jupyter Notebook, IntelliJ IDEA, Eclipse

EXTRA CURRICULAR ACTIVITIES

- Coordinated college's cultural fest, **EPOQUE**

March, 2023

- Collaborated with a team to build solutions for electric vehicle (EV) industry challenges at **EV Hackathon** held in **IIIT Delhi**

September, 2022

EDUCATION

KIET Group of Institutions

Bachelors of Technology in Electronics and Communications Engineering — CGPA: 7.44

Ghaziabad, Uttar Pradesh, India

2019 — 2023

The Aditya Birla Public School

Class XII — 81.5% (Science)

Renukoot, Uttar Pradesh, India

2018—2019
