

RACHIT CHADDHA

+91 9818299259 | Delhi, India

rachitvchaddha@gmail.com | <https://www.linkedin.com/in/rachit-c/>

Data professional with expertise in leveraging data to drive business insights, strategic decision-making, and operational improvements. Skilled in data analysis, machine learning, and statistical modeling, with proficiency in tools like Python, SQL, and data visualization platforms. Adept at translating complex datasets into actionable insights, solving problems, and collaborating with cross-functional teams to implement data-driven solutions. Known for delivering measurable results through innovative approaches and data-backed strategies. Seeking to contribute analytical and technical expertise to a forward-thinking organization, with a focus on both data analysis and advanced predictive modelling.

EXPERIENCE

- **Ai4Less, United Kingdom** **November 2022 – September 2024**
Data Scientist
 - Designed and implemented end-to-end machine learning solutions to optimize operational processes, resulting in a measurable improvement in efficiency and cost reduction.
 - Leveraged advanced statistical analysis and predictive modelling to provide actionable business insights and support data-driven decision-making.
 - Developed and deployed scalable algorithms for various AI-driven applications, including customer behaviour analysis and sales forecasting.
 - Collaborated with cross-functional teams to integrate AI solutions with existing systems, ensuring seamless functionality and maximum impact.
 - Conducted deep data exploration, cleaned datasets, and extracted meaningful patterns to support product development and business strategies.
 - Communicated findings and technical information to non-technical stakeholders, enabling strategic decision-making and promoting data literacy within the organization.
- **Max Infocom, India** **January 2020 – September 2020**
Data Administrator
 - Identified and assessed customer needs, aligning product offerings with tailored solutions to enhance customer satisfaction and drive business growth.
 - Developed and maintained Management Information Systems (MIS) for data analysis, improving data accuracy by 20% and ensuring the timely delivery of weekly reports, directly contributing to informed decision-making processes.
 - Proposed cost management and optimization strategies that increased customer value while streamlining operational expenses.
 - Effectively coordinated project schedules in line with business objectives and customer demands, consistently meeting deadlines and ensuring seamless on-time project delivery.

EDUCATION

- **MSc Data Science and Analytics** **October 2020 – October 2022**
Cardiff University, Cardiff
 - Relevant Modules: Statistics and Probability, Data Visualization, Computational Data Science, Machine Learning.
- **Bachelor of Technology in Information Technology** **August 2015 – December 2019**
Manipal University Jaipur, India
 - Relevant Modules: Data Structures, Data Communications, Cryptography and Network Security, Cloud Computing.

SKILLS

- Programming languages: Python, R, C, Java
- Subject specific software: Simul8, Rational Rose Enterprise
- Web-based technologies: Microsoft Azure, HTML
- Databases: SQL, SAP ERP
- Proficient in MS Excel, Word and PowerPoint

PROJECTS

- **Currency Exchange Rate Forecasting** *September 2023 – October 2023*
 - Studied a currency exchange rate dataset using python and predicted the future value of one currency in terms of another.
 - Employed a decision tree regression model to train and test the data. Evaluated the model performance using mean absolute error and root mean squared error.
 - Predicted the exchange rates for the next 30 days and represented the values on a line chart.
- **Heart Failure Prediction** *March 2022 – May 2022*

Cardiff University

 - Investigated a dataset of 300 individuals diagnosed with heart failure and forecasted the possibility of CVD in patients.
 - Conducted various Biostatistical tests and compared the results using machine learning strategies such as Random Forest and Gradient Boosting.
- **Energy Usage Prediction using Machine Learning** *July 2021 – August 2021*

Cardiff University

 - Compared and analyzed two machine learning models enacted on the dataset provided.
 - Evaluated the methods and compiled results and findings into a report.
- **Data Science Portfolio** *March 2021 – May 2021*

Cardiff University

 - Studied the Airbnb dataset provided using Python and performed exploratory and statistical analysis.
 - Investigated the properties and distributions of the data and identified variables affecting changes within data.
- **Statistical Analysis of NBA Dataset** *December 2020 – February 2021*

Cardiff University

 - Performed descriptive and inferential analysis of the NBA dataset provided using R.
 - Formulated hypotheses and conducted various statistical tests leading to the evaluation of results.
- **Success Criteria for ERP Implementation in Steel Industry** *January 2019 – June 2019*

Manipal University Jaipur

 - Acquired knowledge of SAP BASIS and ABAP and orchestrated the various modules of SAP ERP Software.
 - Integrated and executed the SAP HR module successfully in the organization, specifically Charminar Steel Castings Ltd.

CERTIFICATIONS

- **Introduction to Microsoft Azure Cloud Services** *December 2023 – January 2024*

Coursera
- **Introduction to Artificial Intelligence** *May 2023 – June 2023*

Coursera
- **Python for Developers** *January 2020 – March 2020*

Coding Blocks, India
- **SAP BASIS & Foundation Training Program** *January 2019 – April 2019*

Manipal University Jaipur, India
