Skills

RPA Tools: UI Path
(Studio, Orchestrator,
Robots)

Programming
Languages: HTML,
Python

Database
Management: SQL

Version Control: Git

Operating Systems:
Windows,

Other Tools: Excel
,Figma

Personal Details

Date of Birth: 06/01/2003

Nationality: Indian

Marital Status: Single

Gender: Male

A motivated and detail-oriented individual with a strong foundation in Robotic Process Automation (RPA) using UI Path. Seeking an entry-level position where I can apply skills in automating processes, streamlining workflows, and contributing to business efficiency.

Work History

UI Path RPA Developer
Freelancing & Volunteering

- Completed training course on UI Path

Education

2020-07	B.TECH: CSE DS(AI)
2024-04	Dr.MGR Educational And Research Institute - CHENNAI, TAMILNADU CGPA -8.30

Certifications

UI Path RPA Developer Foundation Diploma

UI Path Advanced RPA Developer Certification

Attributes

- Strong analytical and problem-solving skills.
- Ability to work independently and as part of a team.
- Excellent communication and presentation skills.
- Quick learner with a passion for automation and technology.

Coursework

- Software Engineering
- Automation
- Data Structures
- Algorithms

Languages

English

Tamil

Projects

1.University Project/Personal Project

Song Recommendation Based On Emotion
Mood Detection model can detect face from any images and then it can predict the emotion from that face. We can do it from both still images and videos. After predicting the emotion from face our recommender system take the predicted emotion as input and generate recommendation by processing spotify dataset from a Kaggle contest. We predicted the music mood from model trained with datasets

2. Email Automation Bot

I created an Email Automation Bot using UiPath with SMTP for sending automated responses based on specific keywords found in incoming emails. The bot reads and processes emails, identifies relevant keywords, and sends tailored responses accordingly. It integrates with Excel to manage keyword lists and response templates, ensuring flexibility and easy updates. Additionally, I implemented a logging mechanism to track the bot's activity, making it easier to monitor performance, troubleshoot issues, and ensure reliable operation.
