

ACADEMIC CREDENTIALS:

Qualification	Board/University	Year	Percentage
B.tech (Computer Engineering)	DELHI TECHNOLOGICAL UNIVERSITY(DTU)	2012-2016	7.5
12 th	CBSE	2011	90.2%
10 th	CBSE	2009	86%

WORK EXPERIENCE:

Organization

: Synopsys Ind Pvt. Ltd.

Designation

: Senior R&D Engineer (July 2022 to present)

Role Description

: Working on Zebu and Verdi projects

My role is to enhance current features of Zebu which is an emulation tool. Worked on (i) improving nCompare performance which compares two waveforms (300 secs to 190 secs) and (ii) Adding various windows for ZDM. Technologies used are: C/C++, Linux, gdb, JIRA for bug management.

Organization

: Qbit Labs Pvt Ltd.

Designation

: Lead Software Engineer (May 2021 to June 2022)

Role Description

: Worked on Levitas LR300 tick to trade trading- Accelerated Trading Platform

My role was to strategize on the architecture and I am responsible for providing the sample applications and APIs (part of SW library) which the client uses for doing trading. Aim is to provide ultra low latency to HFT firms (300 ns). This product is intentionally designed for NSE collocation through adopting all the protocols and provides the best solution to HFT firms. Technologies used are: C/C++, Linux, gdb, JIRA for bug management

Organization

: Mentor Graphics Pvt Ltd. Noida

Designation

: Senior Member of Technical Staff (August 2018 to Nov 2020)

Role Description

: Worked on DVT Visualizer tool used for functional verification of RTL

My role and responsibilities :-> I was involved in development and enhancement of the DVT Visualizer tool mainly focusing on the schematic side of it. Giving RTL logic cone, time cone and connectivity tracer applications. Technologies used : C++ for server side and using QT library for the GUI part of the application, Linux, Version control is Perforce, JIRA for bug management.

Organization

: Applied Research International (ARI) Simulation

Designation

: Software Engineer (June 2016 to July 2018)

Role Description

: Work on various simulators and software of the company's clients.

:->Worked on FURUNO NAVSkills CAT simulator (FEA and FMD), a Marine Equipment for Merchant Marine used for training. Technologies using are C++, vb.net, MFC, VISUAL Studio.

My role and responsibilities:->I was involved in development of the simulated course which a trainee has to undergo. I had made various modules for the FEA simulator using wxwidget library and providing them functionality according to the real equipment.

PROJECTS:

1. Tweet Recommender System using Machine Learning in python
- A tweet recommender system designed in python using machine learning algorithm.

• Scikit library is used to implement the feature extraction algorithm.
2. Sentiment Analysis using Word Vectorization in C++
- The project aims at determining whether a piece of writing is positive, negative or neutral.

• Project focuses on a concept of **word2vec**, which converts english words to mathematical vectors.

TECHNICAL PROFICIENCIES:

- Programming Language: C, C++ (Proficient), python (beginner)
- Other Languages and skills: Verilog (intermediate), System Verilog (beginner), Digital and EDA knowledge
- Software& libraries: Photoshop CS5/CS6, MS word, Visual Studio etc., perforce, VNC, wxWidget and QT, makefile , Win32 and Win64

AWARDS,HONORS AND ACCOMPLISHMENTS:

- Scholarship offered for performance in class 12 by Govt. of NCT & in top 1.4% students in AIEEE 2012.
- Member of **CSI** (Computer Society of India) and organized events for society in college fests.
- Organizer of Gully Cricket, a mini-cricket event held in February 2014. Love to cook and sketch.
