- Participated in **SDLC** right from requirement analysis, documentation (functional specifications, technical design), development, unit testing to maintenance of the proposed applications.

IT SKILLS

- Language:** SQL, PLSQL, Basic Java Script
- Development Platform:** Oracle APEX, Oracle Forms & Reports
- IDE:** SQL Developer
- Database:** Oracle
- Bug Tracking:** JIRA.
- Software Development Model:** Agile, SDLC
- Operating Systems:** Windows

WORK EXPERIENCE

Siemens Energy, Gurugram (As a Graduate Trainee Engineer)

Tenure: 03 July 2023 – till date

Siemens Energy, Gurugram (As an Intern)

Tenure: 23 Jan 2023 – 02 July 2023

PROJECTS

Product: Costpro OneClick for Siemens Energy Internal (USA)

Role: Software Developer

Technology and Tools: Oracle Apex (Version 23.2.2), SQL Developer Tools, Jira

Description: The primary goals of Costpro are to track the number of hours laborers work on a power-generating site. Managers will then authorize the laborers' hours worked, and that worker will be paid according to the number of hours worked. As the lone member of the team, I completed the Costpro's development, and it is currently being used in the USA. I am solely accountable for this project, including requirement collection, implementation, and production deployment.

Product: TTA (Tool Tracking Application) for Siemens Energy Internal (USA)

Role: Software Developer

Technology and Tools: Oracle Apex (Version 23.2.2), SQL Developer Tools, Jira

Description: Tracking a shipment with accompanying documentation from a depot to its destination is the main objective of TTA. The user starts the shipment by entering the GO Number and attaching customs paperwork. Once the shipment has arrived, each user updates the status of the shipment, which contains power-generating devices like turbines and other items. I was a member of the development team for this project, which is currently being implemented throughout the Americas.

Product: ERICA (Easy Price Configurator) for Siemens Energy Internal (Germany)

Role: Software Developer

Technology and Tools: Oracle Apex, Sql Developer, Jira

Description: This Price Configurator provides budgetary price estimates for Products based on high level assumptions. Application is being used for price calculation based on few parameters and business logic.

EDUCATION

B.Tech. (Computer Science and Engineering) from Graphic Era Hill University,Dehradun 2023
