Education

Indian Institute of Technology Bhubaneswar

Bachelor of Technology in Electrical Engineering

Oct 2021-May 2025

CGPA:7.48(Till 6th sem)

Adyant Higher Secondary School

Council of Higher Secondary Education (State Board)

Mar 2018-July 2020

12th Board: 85.5 percent

Saraswati Shishu Vidya Mandir

Board Of Secondary Education (State Board)

Jul 2008-Mar 2018

10th Board: 94.5 percent

Experience

IIT Bhubaneswar

Machine Learning Intern

Apr 2024 – Jun 2024

Supervisor: Dr.Nijwm Wary

Command Driven Voice and Image Control System

- Established Bluetooth communication between Python and the ESP32 to send motor control commands.
- Integrated circuit components, including dual H-bridge motor drivers, to control the car's movement based on received commands.
- Implemented voice recognition using Python libraries, enabling hands-free control through spoken commands.
- Developed image recognition capabilities to further enhance autonomous navigation and decision-making.

Research Project

ML Model for Coating Quality Assessment Using EIS | Python, ML

Supervisor: Dr.Kisor Kumar Sahu

- Developed machine learning model to assess coating quality for magnesium.
- Aimed to mitigate magnesium oxidation and improve durability in vehicle manufacturing.
- Focused on identifying optimal coating types through predictive analysis.

Projects

IPL Predictor: Logistic Regression Model | Python, ML, Logistic Regression

- Developed a robust logistic regression model achieving approximately 80 percent accuracy in predicting IPL match winners.
- Leveraged comprehensive data preprocessing techniques and Pandas for efficient dataset handling.
- Implemented using Stream lit for intuitive deployment and interactive visualization of match predictions.

Movie recommended System | Python, ML, NLP

- Built a movie recommendation system with data preprocessing using NumPy and Pandas, applying NLP with NLTK's Porter Stemmer and cosine similarity to generate accurate recommendations.
- Deployed on Stream lit, integrating the TMDb API to display posters for five recommended movies.

E-commerce Performance Analytics Dashboard | Power BI

- Developed an interactive Power BI dashboard with KPIs and visual analytics to track YTD sales, profit margins, and product performance.
- Enabled data-driven decisions with insights into regional sales, shipping efficiency, and product analysis.

Technical Skills

Languages: C++, C, Python, SQL

Other: OOPs, Operating System, DBMS, Data Structure and Algorithms, Competitive Programming, Power BI, Data Visualization, Machine Learning

Achievements and Extra-Curriculars

- 1820 Leetcode [Leetcode](#) | Pupil Codeforces [Codeforces](#) | 4* GFG [GFG](#) | 3* Codechef [Codechef](#)
- Core Head at Alma Fiesta: the annual socio-cultural fest of IIT Bhubaneswar, progressing from core team member to Core Head, managing teams across two years to drive successful multi-college engagement and event turnout.
- Core Head at UBA: Contributed to Unnat Bharat Abhiyan for two years, conducting educational sessions at local schools and organizing social initiatives
