

RAHUL UGALE

NASSCOM Certified Data Scientist / Top 5 Percentile Kaggle Ranker

 Pune, Maharashtra  +91-8767046659  rahulugale091@gmail.com  LinkedIn  Github

SUMMARY

Certified Data Scientist accredited by NASSCOM (Government of India) with extensive expertise in data science, data analysis, machine learning, and artificial intelligence. Proficient in Python, SQL, and Power BI, with hands-on experience in executing diverse data-driven projects across multiple domains. Passionate about solving complex problems and driving growth through data-driven strategies.

EDUCATION

Savitribai Phule Pune University

2020 – 2024

BE - Computer Science and Engineering - CGPA - 8.5

Pune, Maharashtra

SKILLS

- | | | | | |
|---------------------------|-------------------------|-----------------------------------|----------------------|---------------|
| • Data Science | • Machine Learning | • Optimization | • Data Mining | • ML Pipeline |
| • Data Analytics | • Computer Vision | • Exploratory Data Analysis (EDA) | • Data Visualization | • SQL |
| • Artificial Intelligence | • Statistical Modelling | • Data Cleaning | • Neural Networks | • Deployment |
| • Deep Learning | | • Data Wrangling | • NLP | |

TOOLS

- | | | | | | | |
|------------|----------|-----------|--------------|----------|-----------|-------------|
| • Anaconda | • MySQL | • Pandas | • Sklearn | • Keras | • Flask | • PowerBi |
| • Jupyter | • Python | • Scipy | • Matplotlib | • Nltk | • Tableau | • Statmodel |
| • Spyder | • Numpy | • Seaborn | • Tensorflow | • OpenCV | • Excel | • XGBoost |

EXPERIENCE

Naresh i Technology

Jun 2024 - Nov 2024

Role - Data Scientist

Hyderabad, Telangana

- Experience in 20+ Real-time Data Science and Data Analytics Projects from various domains.
- Expertise in delivering End to End analytical solutions covering multiple technologies and tools to multiple business problems.
- Experience in statistical modelling, machine learning, data mining, unstructured data analytics.
- Solved Challenging and muddy problems by leveraging the fundamentals of Data Science and Data Analytics to analyze large amounts of information to discover trends and patterns.
- Design and execute experiments and analyze experimental results.

PROJECTS

Diwali Sales Analysis  | Python, EDA, Numpy, Pandas, Matplotlib, Seaborn

- Performed a Diwali sales analysis using Python, identifying key sales trends and customer behavior.
- Used Matplotlib and Seaborn to visualize insights that shaped marketing strategies.
- Applied Exploratory data analysis techniques to optimize marketing strategies and Sales performance

SMS Spam Classifier  | Nltk, Vectorization, Naive Bayes, Stemming, Lemmatization

- Developed an end to end SMS Spam classifier model using natural language processing (NLP) techniques to classify messages as spam or ham.
- Leveraged text preprocessing methods like stemming and lemmatization, followed by vectorization and Naive Bayes for classification.
- Achieved 97 percent accuracy, demonstrating effective filtering of spam messages.

HR Analytics Dashboard  | PowerBi, DAX, Data cleaning, Power Query, Data Analysis, Reporting

- Developed an HR Analytics Dashboard in Power BI to analyze employee attrition based on tenure, department, and performance.
- Utilized Power Query, DAX, and data cleaning techniques to enhance reporting and support HR decision-making.

Loan Eligibility Status prediction | Logistic Regression, KNN, SVM, Random Forest, XGBoost

- Developed a machine learning model to automate loan eligibility prediction for a housing finance company using customer demographics, income, credit history, and loan details.
- Implemented and evaluated algorithms including Logistic Regression, KNN, SVM, Decision Tree, Random Forest, and XGBoost.
- Achieved almost 95 percent accuracy which predict customer eligibility to the loan approval process.

Real-Time Face and Eye Detection Using OpenCV | OpenCV, Numpy, Haar cascade classifier

- Designed a computer vision model to detect faces and eyes in images using OpenCV.
- Implemented Haarcascade classifiers along with face and eye cascade techniques, converting images to grayscale and drawing bounding rectangles around detected features.
- Successfully built an efficient face detection system with real-time capabilities.

CERTIFICATIONS

- Microsoft Certified: Azure Data Scientist Associate.
- NASSCOM certification of Full Stack Data science and AI.
- Google Data Analytics Professional Certification. - Coursera.
- Complete Generative AI Bootcamp Certification - ISRO.
- PowerBi Zero to Hero Certification - Udemy.
