OBJECTIVE

Linux Systems Administrator with 6 years of enterprise experience managing large-scale RHEL environments across production, test, and development. Strong expertise in Linux administration, OS patching, boot troubleshooting, performance tuning, automation with Ansible. Hands-on experience supporting Linux workloads on VMware vSphere and AWS Cloud (EC2, VPC) with a proven record of maintaining 99.9% uptime.

EDUCATION

M. Tech – Computing Systems & Infrastructure, BITS Pilani
Bachelor of Computer Applications (BCA), RDVV Jabalpur

SKILLS

Linux	RHEL 6/7/8/9, systemd, cron, users/groups, ACLs, SUID/SGID, SELinux, OS hardening, boot troubleshooting.
Patch Management	yum, dnf, rpm, kernel updates, security patching
Storage	LVM, multipath I/O, NFS, filesystem recovery
Monitoring	proactive alerting, log analysis, vmstat, iostat, sar, top
Troubleshooting	CPU/memory/disk I/O, filesystem corruption, boot failures, log analysis
Automation & DevOps	Ansible, AWX, Bash scripting, Jenkins.
Virtualization	VMware ESXi, vCenter, HA/DRS, VDS, V2V, snapshots, Patch & Upgrade ESXI and vCenter.
Cloud	AWS EC2, VPC, subnets, route tables, security groups
Containerization	Docker, Kubernetes (Basic)
ITSM Tools	BMC Remedy, ServiceNow.

EXPERIENCE

Unix Engineer Amdocs DVCi	May 2024 – Present <i>Pune, India</i>
-------------------------------------	--

- Support and administer 5,000+ RHEL Linux servers across production, test, and development environments.
- Perform Linux administration, user/group management, permissions, ACLs, SELinux configuration, and OS hardening.
- Provisioned and decommissioned virtual servers within VMware infrastructure based on business requirements.
- Execute OS patching, kernel upgrades, and vulnerability remediation following change management processes.
- Troubleshoot complex OS-level issues that involve CPU, memory, disk I/O, file system corruption, and boot failures.
- Design and maintain Ansible playbooks for housekeeping, health checks, and operational automation.
- Implement Ansible + Jenkins automation for file system extension and resource management.
- Configure and manage LVM multipath storage.
- Administer VMware ESXi and vCenter environments supporting Linux workloads (HA/DRS, VM lifecycle management).
- Manage AWS EC2 Linux instances within VPC environments, including subnets, security groups, and connectivity.
- Participate in 24×7 on-call rotation, resolving P1/P2/P3 incidents under strict SLA timelines.

- Develop and maintain Linux SOPs and operational documentation in Confluence.
- Integrated AI-assisted automation and knowledge systems to improve Linux troubleshooting efficiency.

Senior Project Engineer
Wipro Technologies

Oct 2019 – May 2024
Pune, India

- Administered 3,000+ Linux (RHEL) servers in large enterprise environments.
- Performed Linux OS builds, upgrades, patching, and decommissioning following ITIL standards.
- Managed LVM, multipath storage and disk performance issues.
- Supported Linux systems hosted on VMware ESXi clusters with HA/DRS configurations.
- Administered Dell VxRail hyper-converged infrastructure, coordinating with vendors for support.
- Led datacenter migration projects, successfully migrating 500+ VMs using vMotion and converter tools.
- Supported Windows administration alongside Linux in mixed OS environments.
- Provided 24×7 production support, handling critical P1/P2/P3 infrastructure incidents.

CERTIFICATIONS

- Red Hat Certified Engineer (RHCE)
- Red Hat Certified System Administrator (RHCSA)
- AWS Certified Cloud Practitioner
