SKILLS

Programming Languages: C++, HTML, CSS, Javascript, Typescript

Tools and Technologies: NodeJs, ExpressJs, NestJs, PostgreSQL, Prisma, Sequelize, Redis, MongoDB, Git, Github, AWS, Microservices, Apache Kafka, Docker, Kubernetes, CI/CD Pipeline, Jenkins, Nginx

Areas of Interest: Data structures and Algorithm, Web Development, Problem Solving

Soft Skills: Leadership, Public Speaking, Time Management, Adaptability

EXPERIENCE

Unisouk | Software Development Engineer

June 2024 – October 2024

- Worked on database schema and api design for product, order, cart, inventory and subscription microservices
- Implemented role-based access control and attribute-based access control feature
- Did research for making Unisouk product with different third party integrations

Lenditt Innovations & Technologies Pvt Ltd | Software Development Engineer

Aug 2023 – May 2024

- Integrated UPI payment system to get loan repayment from customers, saving 2% transaction charge on every transaction
- Integrated WhatsApp messaging feature for users' convenience
- Worked on NestJs framework and PostgreSQL for making different APIs

Highway Delite | Software Development Engineer

Aug 2022 – July 2023

- Worked on inventory management and tracking system using NodeJs, ExpressJs framework and MySQL, saving 10% inventory cost for company
- Worked on making different APIs and payment gateway integration

Highway Delite | Software Development Intern

Nov 2021 – July 2022

- Worked with other developers to debug and learn about the product

PROJECTS

Expense Tracker

Developed an expense tracking app that allows users to register and track their daily expenditures.

- Implemented the Model-View-Controller architecture
- Integrated Razorpay payment gateway to receive payments for membership
- Utilized AWS S3 to generate reports, for efficient storage of data
- Used HTML, CSS, JavaScript, NodeJS, ExpressJS, MySQL, Sequelize, CORS, JWT, AWS EC2 and RDS, PM2
- → [Link to Expense Tracker Project](#)

Group Chat Application

Developed a group chat application that allows users to sign up and create chat groups.

- Developed using HTML, CSS, JavaScript, NodeJS, ExpressJs, Sequelize, CORS, JWT, AWS EC2 and RDS, PM2
- Used Bcrypt library to store encrypted passwords of users in the database
- Followed MVC (Model-View-Controller) pattern
- Used relationships in the database for efficiently storing and querying data
- → [Link to Group Chat Application Project](#)

EDUCATION

College of Technology and Engineering, Udaipur

Jul 2016 – June 2020

B.Tech(7.44 OGPA)

DS Science Academy

Jul 2014 – June 2015

12th(91.60%)

ACHIEVEMENTS

- Solved more than 400 problems of DSA
- Got 22081 rank in jee main 2016 over 1.5 million candidates
