Summary

Journey into the world of SAP ABAP and Python Development, Highly motivated and detail-oriented ABAP Developer and Python Programmer with a strong foundation in SAP development and coding expertise. Proficient in designing, implementing, and optimizing, SAP modules. Skilled in problem-solving, debugging, and delivering user-friendly solutions to complex technical challenges. Adept at collaborating with cross-functional teams to drive process improvements and support organizational goals.

Skills

ABAP program • Python • OOPS • HTML • SQL

Projects

Face Recognition Attendance System Hyderabad, India
10/2023 - 02/2024

In the digital age, traditional methods of attendance tracking, such as manual logs, punch cards, or QR codes, are proving to be inefficient, prone to errors, and often subject to misuse. With the increasing focus on automation and artificial intelligence (AI), the need for more accurate, secure, and efficient systems has become critical. In response to these challenges, I developed an innovative Python-based attendance tracking system that leverages face recognition technology combined with a user-friendly Graphical User Interface (GUI). This project, which was part of my academic experience at BV Raju Institute of Technology (BVRIT), was aimed at modernizing and simplifying attendance management across various environments, such as educational institutions, corporate offices, and events.

- Developed a face recognition attendance system using Python and OpenCV.
- Integrated a sleek GUI with Tkinter for an intuitive user experience.
- Implemented secure registration and dynamic data updates with real-time attendance logs.

Education

Triveni Talent School Hyderabad, India
Class X 01/2018 - 01/2018

Srichaitanya Junior Kalasala Hyderabad, India
Class XI 01/2019 - 01/2019

BV Raju Institute of Technology Hyderabad, India
B.Tech - Computer Science and Engineering 08/2020 - 08/2024

Certification

Infosys springboard, SAP Abap.

Internship

SAP Hyderabad
Sap Abap Programmer 2024 - Present

Company Description

- Assisted in developing, debugging, and optimizing ABAP programs to enhance SAP module functionality. Supported the team in creating custom reports, forms, and interfaces to meet client-specific requirements.

JAVATPOINT Hyderabad, India
Content Creator Intern 02/2023 - 05/2023

JAVATPOINT is a leading online education and tutorial platform.

- Created engaging and informative content for the Javatpoint website.
- Researched technical concepts and simplified them for readers, improving site traffic and engagement.
- Highlight your accomplishments, using numbers if possible.
