Summary

Data Scientist with 4 years of experience in machine learning, data analytics, and A/B testing and 7 years of comprehensive experience in the tech industry. Proficient in Python, R, SQL, Tableau, Scikit-Learn, and Stats Models. Skilled at actively driving significant business impact, mentoring junior data scientists, and identifying data-driven opportunities proactively. Committed to driving business insights and informed decision-making through data-driven solutions.

Experience

Data Scientist- (Jun 2022 – Present)

JPMorgan Chase & Co

- Implemented a churn prediction model using logistic regression and random forest, reducing customer churn by 15% and retaining \$5M in annual revenue.
- Worked with cross-functional stakeholders, product, and engineering to hypothesize and conduct A/B testing for website features using SQL and Python, which increased user engagement by 20% and conversion rates by 12%.
- Acted as a tech lead for the project with a team of 3 data scientists, developing a customer LTV model using R and SQL, enabling targeted marketing strategies, and increasing average customer LTV by 18%.
- Performed deep-dive analysis on customer usage patterns with R and Pandas, identifying key trends that led to a 20% improvement in product retention.

Senior Analyst – Data Quality (Nov 2021 – Jun 2022)

Societe Generale

- Implemented a churn prediction model using logistic regression and random forest, reducing customer churn by 15% and retaining \$5M in annual revenue.
- Worked with cross-functional stakeholders, product, and engineering to hypothesize and conduct A/B testing for website features using SQL and Python, which increased user engagement by 20% and conversion rates by 12%.
- Acted as a tech lead for the project with a team of 3 data scientists, developing a customer LTV model using R and SQL, enabling targeted marketing strategies, and increasing average customer LTV by 18%.
- Performed deep-dive analysis on customer usage patterns with R and Pandas, identifying key trends that led to a 20% improvement in product retention.
-

Analyst (Jun 2019 – Sep 2021)

Axis Bank

- Improved internal knowledge sharing by developing comprehensive documentation outlining standard operating procedures for various tasks.
- Validated results and performed quality assurance to assess accuracy of data.
- Queried databases for information needed for report processing.

Skills

Programming Languages: Python, R, SQL, C

Data Manipulation & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, ggplot2, Tableau, Looker Functional Expertise: Metrics Definition & Tracking, A/B Testing & Design, Stakeholder Communication

Statistics & Machine Learning: Logistic Regression, Linear Regression, Clustering (K-Means), Principal Component Analysis (PCA), Scikit-Learn, StatsModels, XGBoost, Random Forest, Decision Trees

Tools & Cloud Platforms: Jupyter Notebooks, DataBricks, RStudio, Git, AWS, Google Cloud Platform

Education

Finance and Business administration - *Manipal University*

Graduation Year - 01/2019

Electronics and Communication Engineering *Anna University*

Graduation Year -01/2017

Artificial Intelligence & Machine Learning *The University of Texas, Austin*

Expected Graduation Year -Mar 2025

Achievements

- Awarded for LLM Hackathon (Training data to provide relevant response)
- 2nd Runner-Up, "Hack Your Future" Hackathon - for creative problem-solving using predictive modeling.
- Data analysis QA programmer - Tech zone Outstander
