

Ramchander Rao S – Work Profile

M.Tech CSE, IIT Bombay

Linkdin <https://www.linkedin.com/in/ramsldn>

Cell:WhatsApp: 9063532689

Email:ramsemail689@gmail.com

Objective With 24 years of Software Development experience in various Techno-Managerial roles, Seeking for a suitable opportunity in the areas of Telecom, VoIP, 4G, 5G, Datacom, Unified communications, and System & Web Applications

Employment	▪ Worked at Tech Mahindra Ltd from Apr-2000 to May-2023 in various roles as Delivery Manager, Technical Architect, Tech Lead, Software Engineer
Education	• M.Tech In CSE from I.I.T.Bombay 1999. B.Tech in CSE from Sri Krishnadevaraya University 1997

Skill Set

• Programming Languages C, C++, VC++, Java, Python, HTML, CSS, JavaScript	• Protocols TCP/IP,UDP, SIP, SIP-T, IMS, LTE, 5G, Radius, Diameter, SDP, RTP, CRTP, SRTP, 4G, 5G, XML, HTTP, SS7, ISUP, ISDN, VoIP, MEGACO, MGCP, H323, SMDI, PPP, CHAP, SRGS, XML, PIDF, RPIDF
• Operating Systems Linux, Windows, VxWorks, Solaris	
• Tools SIPp, Wrireshark, Lex&Yacc, Flex&Bison, Splunk, JMeter, curl	
• Database MySQL, Oracle, Mango, Redis	
• Open Sources OSIP, Asterisk, OpenSER, OpenIMS, libsrtp	

Professional Summary

➤ Product Development As a Techie and having a passion for programming , Designed and implemented Multi level data structures, Search and Hash Algorithms, Delta timers, State Machines, Parsers, Image Handling, Time Series Plots, Socket Programming, Inter Process / Multi-Threading and Performance Improvements. Well versed with reading RFCs, IETF, ETSI, 3GPP standards
➤ Managerial Aspects As a Delivery / Project Manager, worked in various SDLC models especially Agile methodologies. Trained and Applied PMP for Project Management. Adhered to all ISO/CMM quality procedures. Audits, Handled peak team size of 60+ team members. Executed all phases of product development starting from requirements, implementation, testing and Sustenance.
➤ Onsite Travel Travelled to USA, Canada, Israel and UK for requirements gathering, architecture creation, PoC development, interoperability and Acceptance Support.
➤ Solutioning Developed multiple PoCs on 5G, MEC, Add Server, Port , O&G, IoT Open Stack, CLL. Provided technical solution and estimation for numerous Proposals Pre-Sales support and was part of high value wins.
➤ Automation As a passion towards programming, wrote multiple tools, simulators and test drivers for simulating messages of the protocols like, SIP, XML, RADIUS, Diameter, IMS, IP Traffic. For both individual and bulk / load scenarios.
➤ Centre of Excellence As an SME was always part of CoEs related to new protocols framework development, Cloud, AI, innovation

Achievements

❖ Was appreciated by customer for Technical contributions towards their product Architecture
❖ Received ACE award multiple times for delivery excellence
❖ Was rated star performer for resolving crash issues during the critical phase of project delivery
❖ Was rated outstanding multiple times across groups for technical contribution
❖ Was chess champion multiple times in companywide competitions

Highlights of Projects'

1. VoIP Protocol Stacks As a core developer, extensively worked on scratch product development of Session Initiation Protocol (SIP) stack and SIP extensions. Worked extensively on call feature implementation like Call Hold, All types of Call transfers, Presence, Click to Dial, Instant Messaging. This product was deployed in Telecom Company USA. Technologies C, C++, Linux
2. Soft Switch Worked on Development and enhancements of Soft Switch Product which can act as Class-4 or Class-5 switch. It supports multi protocols like SIP, H323, MEGACP, MGCP, AIN Call Model, SS7, ISDN, ISUP, TCAP, stable BHCA Tech C, C++, Linux
3. Call Features Worked extensively on SIP based call feature implementation like Call Hold, All types of Call transfers, Presence Server, Click to Dial, Instant Messaging, SIP-T, SRGS, Call State Change notification, Mailbox configuration of IP-PBX, Media Server, Media Gateway, This was for telecom companies in USA and Canada. Technologies C, C++, Linux.
4. IP Multimedia Subsystem (IMS) Worked on IMS components P-CSCF, I-CSCF, S-CSCF, HSS, IPSMGW, Diameter online/offline charging Chat Server. Extensively worked on scratch product development of IMS like Voice communication system for financiers with standard Call features, Media Gateway, Media Server and additions features for Traders. This was for companies in USA, Israel. UK
5. Unified Communications. Worked on the development of UC portal supporting multimedia features using Server provided REST API by a well-known TEM company in USA. Technologies used are C++, Linux, JBOS, WebSockets, WebRTC
6. Long Term Evolution (LTE) Worked on EPC, SAE Gateway, Wireless Network Emulator extensions with Secure User Plane Location Platform (SUPL), Machine-Critical-Push-to-Talk MC-PTT. This was for companies in USA. Technologies C++, Linux. DotNet
7. Multi-Access Edge Computing (MEC). Lead the team for application like Add Server, Port Automation, Industry 4.0 Apps for hosting at MEC. This was part of solutioning. Technologies used are Java, Python, Windows.
8. Billing App Was part of code refactoring and stability improvement of a Billing Application of a popular service provide in UK. Technologies. C, Linux
9. Datacon Lead the team for IP Probe feature enhancements PPP, CHAP, CRTP for an IP Probe of a company based out of USA. Lead the team for IPv6 dual stack product enhancements. Technologies C, Linux
10. Image Analysis Individually developed an image analysis solution for processing the microscopic images of semiconductor chips for a popular semicon company in California USA. Technologies Python, HTML, CSS, JQuery Windows

--- Thank You
