CAREER OBJECTIVE

Results-driven **Senior Software Engineer** with over **9 years of experience** in designing, developing, and delivering Android-based mobile applications. Seeking a challenging role in a dynamic organization where I can utilize my technical expertise in Android development, MVVM architecture, and full project lifecycle management to contribute to organizational success and professional growth.

PROFESSIONAL SUMMARY

- **9+ years of experience in Android application development** with hands-on expertise in **mobile UI/UX design**, integrating **REST APIs**, and leveraging **Firebase** for real-time data synchronization.
 - Proven track record in **tablet-optimized designs**, **e-commerce solutions**, and **employee management systems**, contributing to multiple high-impact projects from conceptualization to deployment.
 - Proficient in developing applications using **Java**, **Kotlin**, and the **Android SDK** with a solid grasp of **MVVM architecture**, **material design**, and **Jetpack Compose**.
 - Experience in full software development lifecycle (SDLC), including requirement analysis, system design, development, testing, deployment, and production support.
 - Expertise in **version control systems** like **Git**, **Bitbucket**, and **Source Tree**, and working in **Agile** development environments with cross-functional teams.
 - Strong problem-solving skills with the ability to debug and resolve production issues by analyzing logs and conducting rigorous testing.
-

TECHNICAL SKILLS

Languages & Technologies:

- **Java**, **Kotlin**, **XML**, **HTML**, **SQL**
- **Android SDK**, **Android Studio**, **Ionic Framework**, **Flutter**, **Angular**

Tools & Version Control:

- **Git**, **GitHub**, **GitLab**, **Bitbucket**, **Source Tree**, **TortoiseGit**

UI/UX Frameworks & Libraries:

- **Material Design**, **Jetpack Compose**, **Volley**, **Glide**

Development Methodologies & Architecture:

- **MVVM architecture**, **Agile**, **Scrum**

APIs & Databases:

- **REST APIs**, **SOAP APIs**, **Firebase**, **SQLite**

Operating Systems:

- **Windows**, **Linux (Ubuntu)**, **Mac OS**

PROFESSIONAL EXPERIENCE

Technoflair IT Solutions, Hyderabad

Senior Software Engineer

April 2018 – Present

- Leading Android application development for various in-house and client projects, including **e-commerce, employee management, and school management systems**.
- Architected and implemented applications using **MVVM** design pattern, improving code maintainability and scalability.
- Integrated **REST APIs** and **Firestore** for real-time data handling, push notifications, and background synchronization.
- Conducted **code reviews**, ensuring best practices are followed for performance, security, and scalability.
- Collaborated with QA and DevOps teams for seamless **CI/CD** (Continuous Integration/Continuous Deployment) processes, ensuring timely delivery of production-ready apps.

VOLKSOFT TECHNOLOGIES, Hyderabad

Software Engineer

March 2017 – April 2018

- Developed and optimized Android apps with a focus on **UI/UX improvements** and backend API integrations for customer-focused applications.
- Worked closely with cross-functional teams, providing full-cycle development support from requirements gathering to deployment and maintenance.

Richlabz IT Solutions, Hyderabad

Software Engineer

May 2015 – March 2017

- Designed and developed Android applications, integrating complex features like **location tracking, payment gateways, and push notifications**.
- Delivered tailored solutions to client-specific requirements, ensuring high standards in design, testing, and deployment.

KEY PROJECTS

PKC Laundries

- Developed a mobile application for laundry services allowing users to schedule pickups, track orders, and view status updates.
- *Technologies:* Android, Java, REST APIs.
- [PKC Laundries App](#)

Bringerz

- Built an online platform for ordering fresh produce directly from farms, delivering a seamless user experience for e-commerce transactions.
- *Technologies:* Android, Kotlin, Firebase.
- [Bringerz App](#)

Smiley Serve

- Subscription-based e-commerce app delivering daily essentials like milk and newspapers, featuring real-time order tracking.
- *Technologies:* Android, MVVM, Firebase.
- [Smiley Serve App](#)

TFApps

- Developed an employee management app for tracking attendance, leaves, and other HR functions, streamlining internal operations.
- *Technologies:* Android, Kotlin, REST APIs.

YoSKool

- School management system allowing staff, students, and parents to handle administrative tasks digitally, including scheduling and communication.
- *Technologies:* Android, Java, SQLite.

ROLES & RESPONSIBILITIES

- Designed and developed Android apps using **MVVM architecture** to ensure modular and scalable codebases.
- Integrated backend services through **REST APIs** and managed **Firebase** for features like push notifications and data storage.
- Led the **code review** process to ensure code quality and alignment with best practices.
- Created and maintained unit tests using **Mockito** to ensure functionality and stability of apps.
- Contributed to CI/CD pipelines, streamlining the deployment process and ensuring timely app updates.

EDUCATION

- **M.C.A. (Master of Computer Applications)** – M.I.I.T, Kakatiya University (2011) – 80%
- **B.Sc. (Mathematics, Physics, Electronics)** – Masterji Degree College, Kakatiya University (2008) – 67.5%
- **Intermediate (10+2)** – K.G. Junior College (2005) – 74.5%
- **S.S.C.** – Vidyodaya High School (2003) – 74.1%

PERSONAL DETAILS

- **Father's Name:** Ramulu Sudhanapu
- **Date of Birth:** 22 Nov 1987
- **Languages:** English, Telugu
- **Nationality:** Indian
- **Gender:** Male
