

N. RAMESH

Email: rameshnenavath369@gmail.com | Phone: +91-9948368377

PROFESSIONAL SUMMARY

- 4.5 years of programming experience as a PL/SQL Developer in Analysis, Design, and Implementation of Business Applications using Oracle RDBMS.
- Expertise in all phases of the SDLC from analysis, design, development, testing, implementation, and maintenance.
- Proficient in creating complex database objects like Stored Procedures, Functions, Packages, and Triggers using SQL and PL/SQL.
- Strong knowledge in writing PL/SQL queries, procedures, and packages for performance optimization.
- Developed UNIX Shell Scripts to automate database processes.
- Proven experience in handling client meetings, understanding requirements, and delivering business benefits through Agile processes.
- Excellent problem-solving and analytical skills with a strong understanding of Data Warehousing Concepts.

TECHNICAL SKILLS

- Databases: Oracle 11g/12c
- Programming Languages: SQL, PL/SQL
- Tools: SQL Developer, TOAD, SQL Navigator, SQL*Loader
- Operating Systems: Windows, UNIX
- ETL Tools: SSIS, SQL*Loader
- Reporting Tools: Crystal Reports
- Version Control: Git

EXPERIENCE

Intellisense software private limited, Bangalore (June 2020 – Nov 2024)

Last working day at current position: November 30, 2024

PL/SQL Developer

- Collaborated with cross-functional teams to design and develop robust database solutions using PL/SQL.
- Created and optimized database objects such as Tables, Views, Synonyms, Sequences, Indexes, and Constraints.
- Wrote complex SQL queries, including joins, subqueries, and correlated subqueries, for data retrieval and reporting.
- Developed reusable PL/SQL packages, procedures, functions, and triggers as per business requirements.

- Performed data loading operations using SQL Loader and UTL file handling based on different file formats.
- Conducted unit testing and integrity testing to ensure high-quality deliverables.
- Involved in performance tuning by using Explain Plan and optimizing SQL queries.
- Documented technical specifications and created detailed test cases for each implementation.
- Supported production by troubleshooting issues and providing prompt resolutions.

PROJECT EXPERIENCE

Project 1: ICICI Bank – Anti-Money Laundering and Fraud Detection (AMLOCK)

Role: PL/SQL Developer

Environment: Oracle SQL, PL/SQL, Windows

Duration: April 2022 – Present

Description:

ICICI Bank's Anti-Money Laundering and Fraud Detection (AMLOCK) project was aimed at building a robust system to monitor and flag suspicious transactions that could indicate money laundering activities. The system automates the detection process by analyzing real-time and historical data to identify potential fraudulent behavior. The application also allows banking officials to manage transaction data, monitor user behavior, and generate reports for regulatory compliance.

- Developed and optimized PL/SQL packages, procedures, and functions to handle high-volume transaction data.
- Implemented rules to detect suspicious activities and set thresholds for business logic to trigger alerts.
- Created database objects including tables, indexes, and views for managing account, customer, and transaction data.
- Wrote complex SQL queries for generating reports on customer behavior, transactions, and flagged activities.
- Collaborated with the fraud detection team to fine-tune the detection logic and ensure accurate identification of illicit activities.
- Performed data migration and data validation tasks for integrating legacy systems with the AMLOCK application.
- Assisted with technical documentation and coordinated with the client to resolve system issues.

Project 2: IMFA India – IMFA.NET

Role: PL/SQL Developer

Environment: Oracle 11g, TOAD*

Duration:* June 2020 – February 2022

Description:

IMFA.NET is a comprehensive financial application developed for IMFA India to streamline and manage their budgeting, planning, and financial reporting processes. This project facilitated the company in planning its annual business operations, budgeting across departments, and generating detailed MIS reports for the leadership team. The project involved creating and maintaining complex data structures to track financial data at various levels of the organization.

- Developed and maintained PL/SQL procedures, triggers, functions, and indexes to handle budget planning and financial data.
- Automated repetitive tasks using UNIX Shell Scripts, improving the efficiency of database management processes.
- Created and optimized database partitions and indexes to manage large volumes of financial data, improving performance and scalability.
- Designed and developed ETL processes to integrate data from multiple sources into the central system.
- Implemented data validation and reconciliation techniques to ensure the accuracy of the financial data being processed.
- Developed SQL*Loader scripts to load daily financial data from flat files into the Oracle database.
- Collaborated with the finance and operations teams to identify and resolve issues in budget consolidation and reporting.
- Delivered end-user training and documentation to ensure smooth adoption of the new system by business users.

EDUCATION

****Bachelor of Technology**** in Electronic and Communication Engineering
Jawaharlal Nehru Technological University-Hyderabad (2017)

PERSONAL DETAILS

- Name: N. Ramesh
- Nationality: Indian
- Date of Birth: 10th May 1992
- Marital Status: Married
- Languages Known: English, Telugu, Hindi
- Current Location: Hyderabad
