

Ramkrishna Birla

Software Developer | Indore, MP
+916263415869 | rmkbirla@gmail.com | LinkedIn Profile | GitHub

Summary

Entry-level Software Engineer with experience in instructing and mentoring individuals in programming concepts and data structures. Gained skills in enhancing students' understanding through customized exercises and efficient problem-solving. Holds proficiency in C++, Java, Node.js, React.js, SQL, and full-stack web development. Seeking to leverage programming expertise to contribute to developing scalable and maintainable applications.

Work Experience

Coding Ninjas

Assistant Intern

Remote

Jul 2023 - Nov 2023

- Led the instruction and mentoring of over 250 students in programming concepts, focusing on developing strong foundations in **C++ and Data Structures & Algorithms**, configuring learning materials to address individual needs.
- Designed and conducted exercises and challenges to cement understanding of **complex programming concepts** and their applications, paralleling skills in Object-Oriented Programming and efficient code practices.
- Achieved a high satisfaction rating (4.81/5) by expertly resolving 450+ student queries, showcasing adept problem-solving abilities and a solid understanding of logic development necessary for effective **software development**, including proficiency in programming languages and best coding practices.

Education

Indian Institute of Information Technology Kota

Bachelor of Technology, Electronics and Communication Engineering

May 2024

CGPA: 7.33

Jawahar Navodaya Vidyalaya, Khargone, M.P.

Higher Secondary

Apr 2019

Percent: 88.60

Projects

Hungry Potato

Sep 2024

- Developed a full-stack restaurant management system using React.js for the frontend, Node.js for the backend, MongoDB for database management, and Elastic search for fast searching in database, ensuring a seamless experience.
- Integrated Twilio for 100% **secure OTP-based authentication**, and Stripe **payment gateway** for secure food ordering.
- Designed a **web app** using Figma, JSX, SCSS, React.js, and other technologies, featuring dish selection, cart, payment, and more. Integrated admin, cook, and staff panels to streamline **complete management** and flow of supply and demand.
- Leveraged **Kafka messages and web socket** to establish connection pipeline, allowing real-time notifications at staff panels as updates of table occupancy and order status, improving operational efficiency and coordination by 15%.

Smart Attendance System

May 2023

- Engineered an automated attendance system using **Python**, OpenCV and Excel integration. Eliminated manual processes, ensuring accurate attendance records and improving efficiency in attendance management.
- Achieved a 100% reduction in manual work, saving over 5 hours weekly by automating the attendance recording process. Utilized state-of-the-art **facial recognition** technology with a 90% accuracy rate for reliable identification.

Metro Map

Jul 2023

- Developed a Java-based metro map application using **Dijkstra's Algorithm and Graph data structures** to calculate the shortest path, routes, and fares between 32 metro stations, with nodes representing stations connected by pre-defined distances and fares.
- Implemented an efficient route-finding solution, delivering accurate fare calculations and optimal paths for over 50 route combinations, improving users' journey planning by 100% in terms of route accuracy and fare estimation.

Skills

Languages: C++, Java, Python, HTML/CSS, JavaScript, PHP, SQL

Frameworks & Libraries: Node.js, Express.js, Django REST Framework, React.js, Advance Java (JDBC)

Tools, Technologies & Databases: Git, Linux, MongoDB, MySQL, Kafka, Elastic search, Docker, Postman, VS Code, Eclipse

Areas of Expertise: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Full-Stack Web Development, Database, Management System, Operating System, System Design and Analysis, Computer Networking, Software Development Life Cycle, REST API's, Deployment

Certifications

Top Performer- Certificate of Excellence in Data Structures and Algorithms in C++: Coding Ninjas, May 2023

Top Performer- Certificate of Excellence - Introduction to C++: Coding Ninjas, Feb 2023
